OUR COLLEGE TODAY

THIS IS TRI-STATE COLLEGE

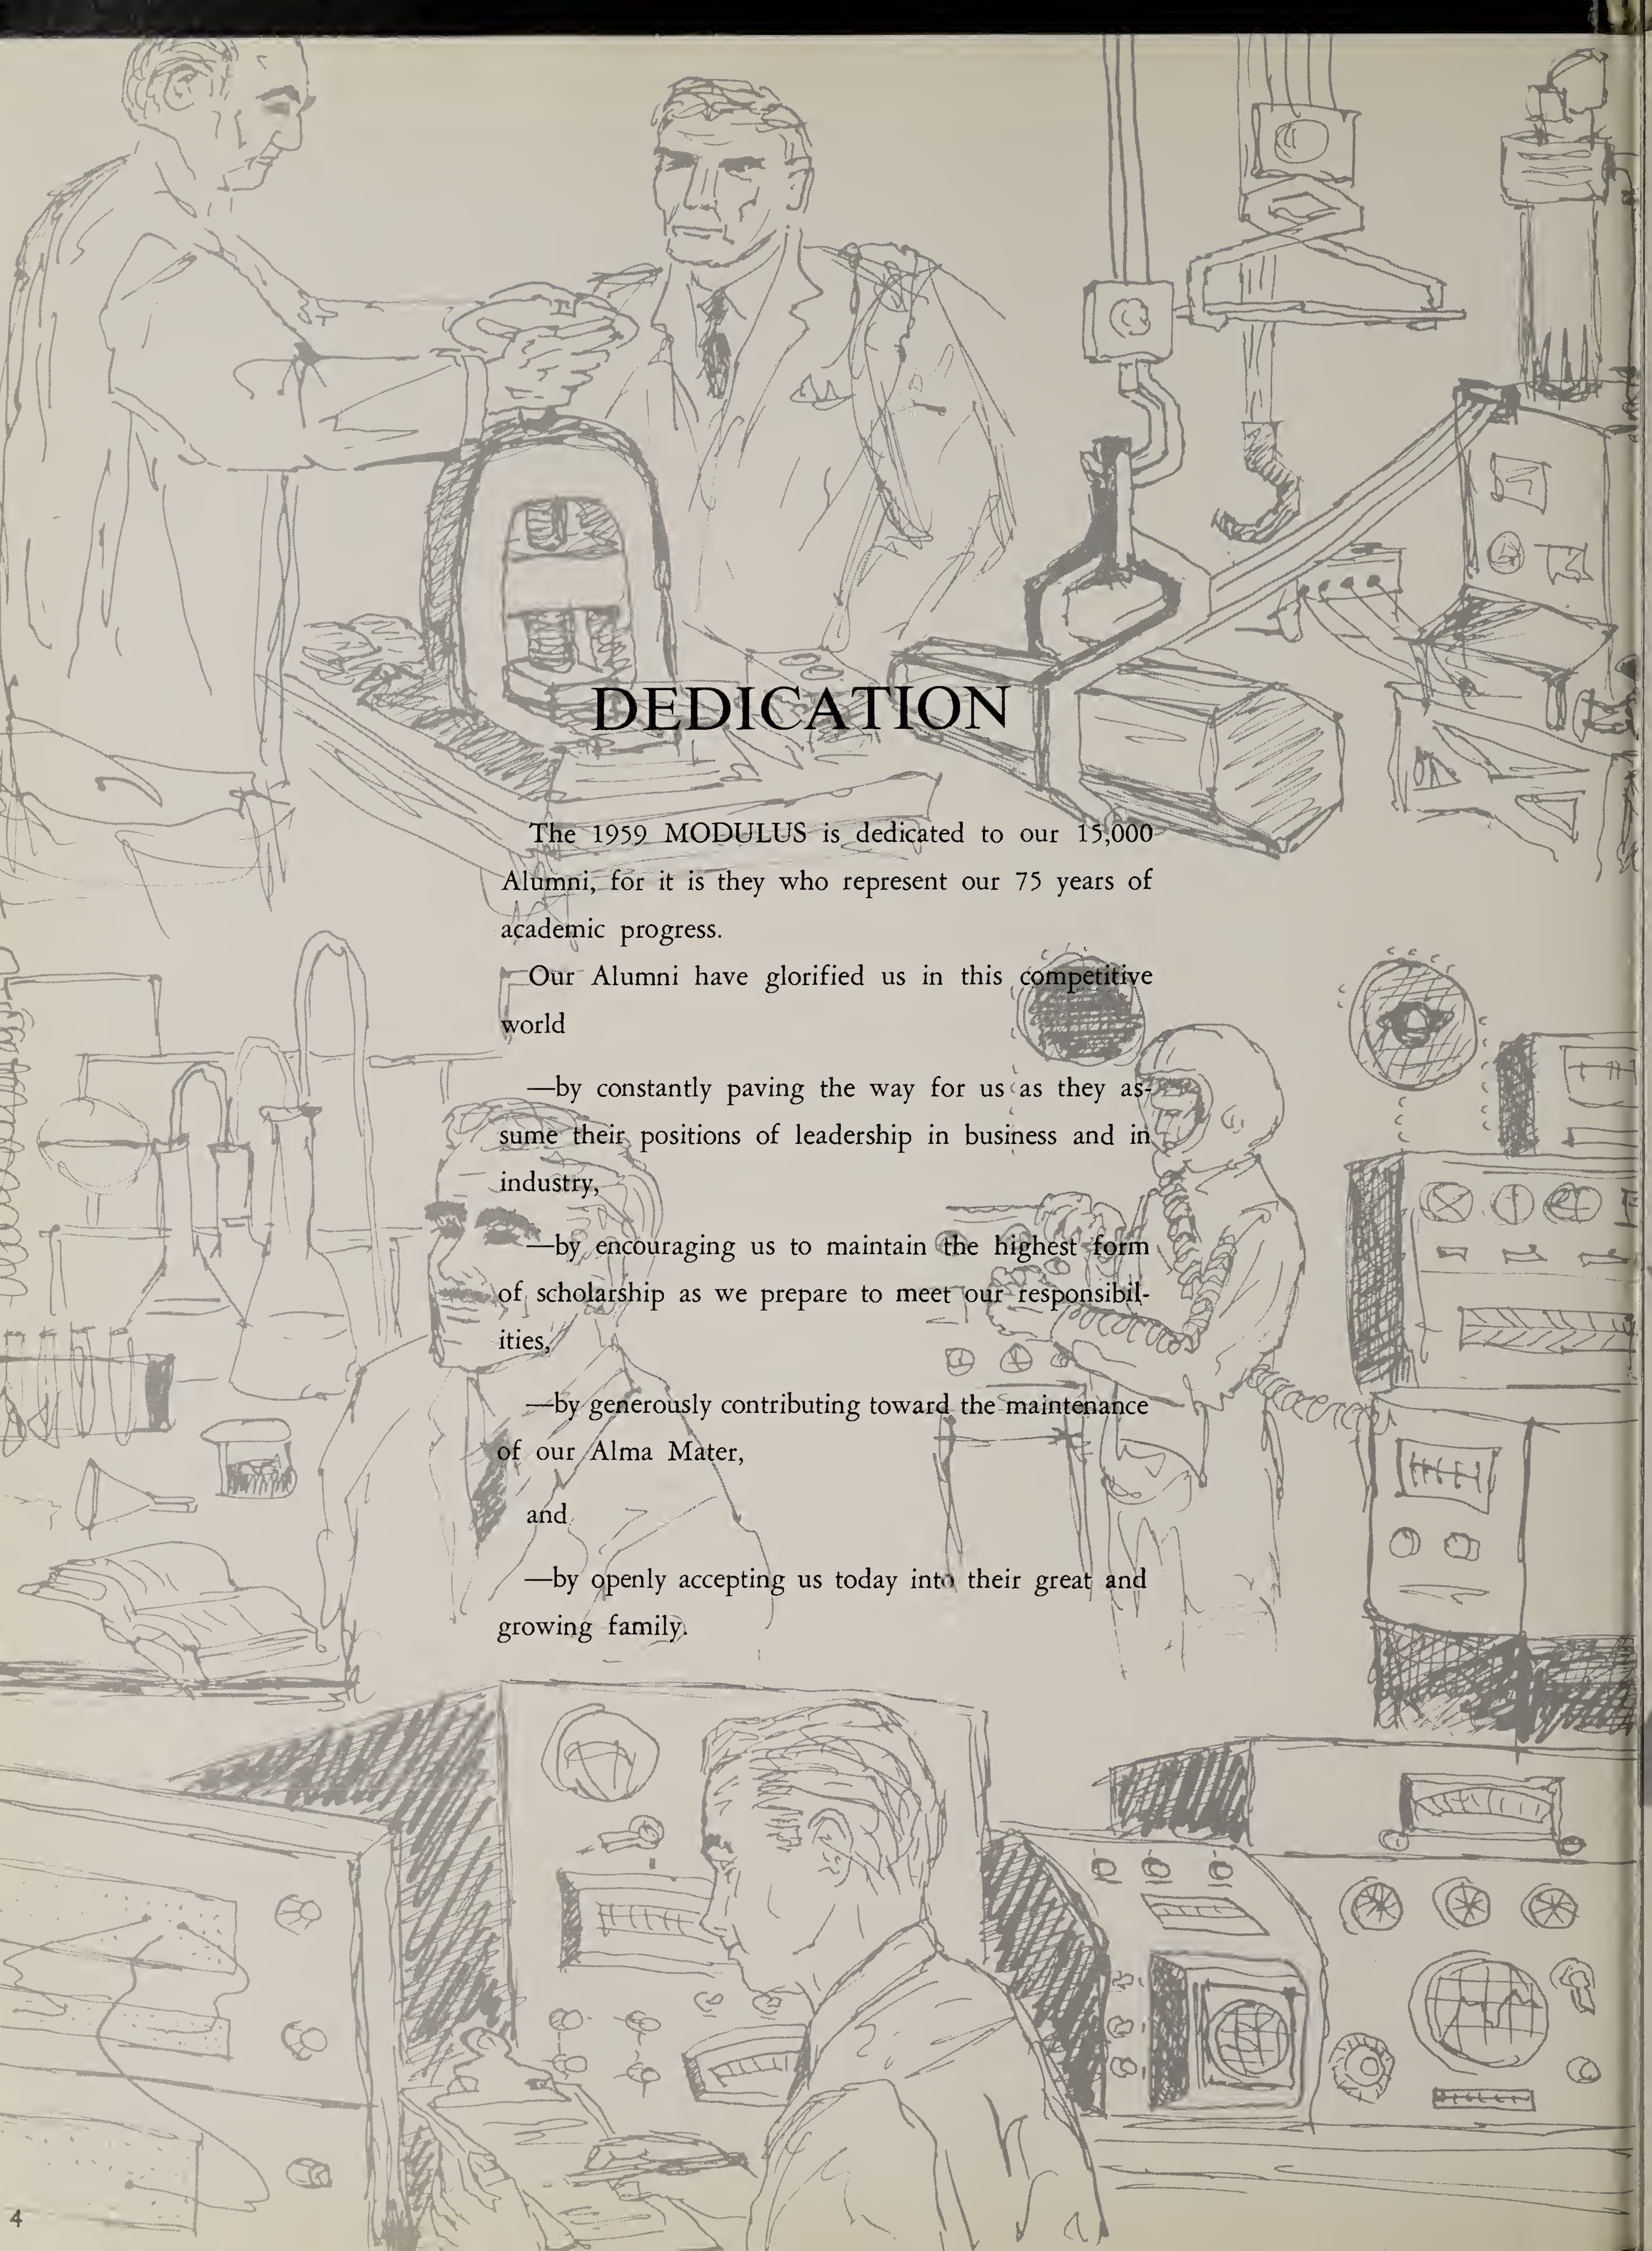
We officially pledge ourselves not only to maintain the best of the services which have characterized Tri-State College since its founding, but also to study constantly our educational aims and objectives in line with changing needs.

It is our sincere desire that Tri-State College should be of even greater service to our youth and our society as future opportunities unfold.

Tri-State College shall offer men and women the opportunity to prepare themselves, in the shortest time consistent with sound training, for useful careers as leaders in business and in industry and as citizens in our society.

ULUS 1959

TRI-STATE COLLEGE, ANGOLA, INDIANA



DEDICATION

The 1959 MODULUS is dedicated to our 15,000 Alumni, for it is they who represent our 75 years of academic progress.

Our Alumni have glorified us in this competitive world

—by constantly paving the way for us as they assume their positions of leadership in business and in industry,

—by encouraging us to maintain the highest form of scholarship as we prepare to meet our responsibilities,

—by generously contributing toward the maintenance of our Alma Mater,

and

—by openly accepting us today into their great and growing family.

The heart of Angola in the early 1800's.

TELL ME THE TALES, THAT WERE SO DEAR . . .
LONG — LONG AGO . . .

The tower of the Ad building symbolizing perpetually the high goals that our students set for themselves.

On July 25, 1883, the late Dr. H. D. Wood and a group of Angola citizens purchased a six-acre tract of land in the southwestern part of town. On this land they organized and built a normal school.

Two buildings were immediately erected—the one is the present School of Commerce and the other was a dormitory and a boarding hall.

On June 17, 1884, the college buildings were formally dedicated and school opened with about 40 students.

The first president of the college was C. E. Kerchy, who retired after the first year and was succeeded by L. M. Sniff. President Sniff served in office for 37 years.

From time to time throughout the history of the college more departments were added and courses were offered in commerce, music, liberal arts, philosophy, science, fine arts, pharmacy, and engineering.

In 1906, the college was incorporated under the laws of the State of Indiana and was authorized by charter to grant degrees.

An Angola winter scene at the circle in the 1860's.

TRI STATE COLLEGE, ANGOLA, IND.

100, 200, and 300 long, long ago. Ad building before the fire.

More and more the college began to specialize in technical work. In 1927, a reorganization was brought about.

The commercial department was developed into a strong, modern school of commerce. The school of engineering was strengthened and more courses were added.

By the end of 1928, all departments except these two were abandoned.

A 1909 commencement scene held at the side entrance to the Ad building.

The old campus walk up to the President's house on the campus.

AND THE HILL NO LONGER STOOD STILL . . .

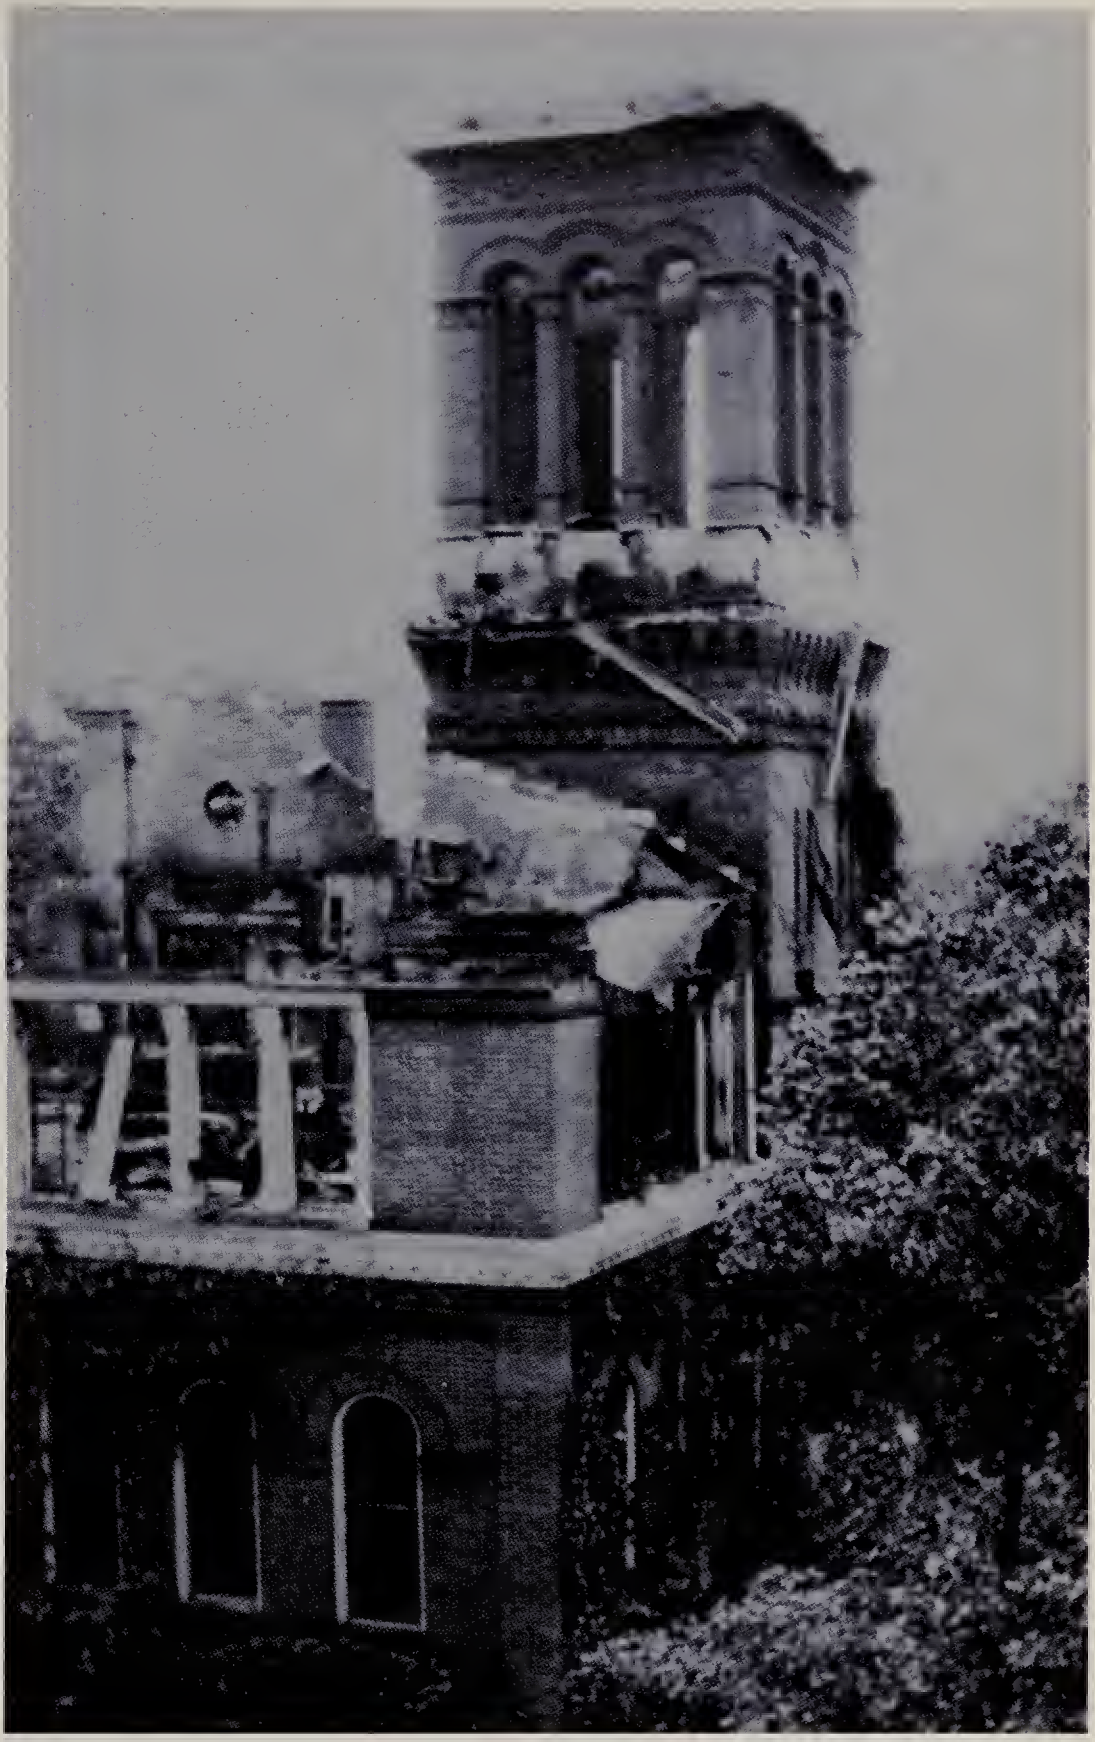
Expansion of the campus was a natural thing brought on by the demands of such courses as telegraphy, phonography, elocution, teachers training, domestic science, pedagogy, education, pharmacy, classics, and law.

High on campus hill always reaching for the best that there is in man!

The administration office when telephone receivers were placed on a hook.

Campus walk to the fountain in 1924.

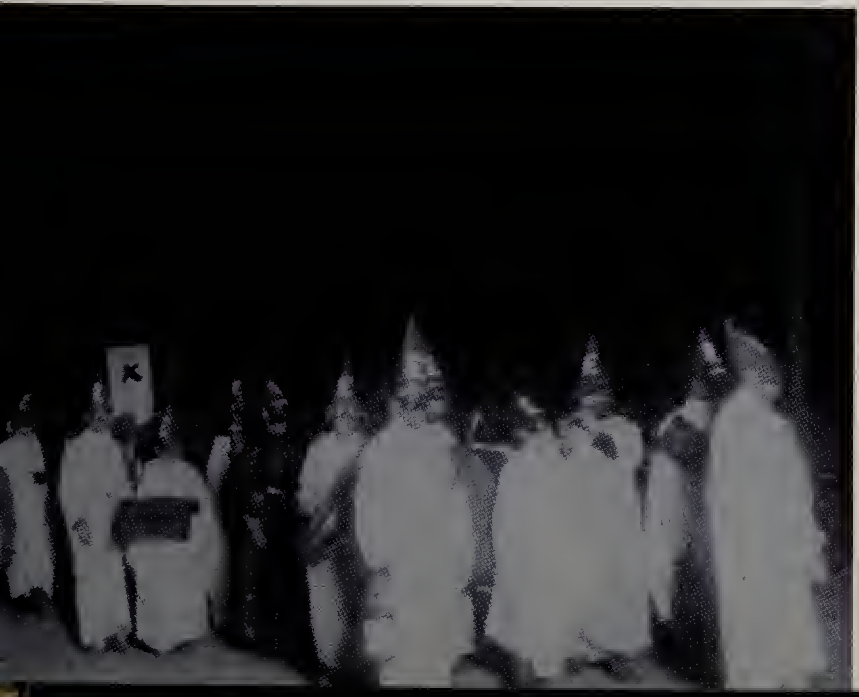
When Tri-State College was founded the grammar school was the common school of the country.



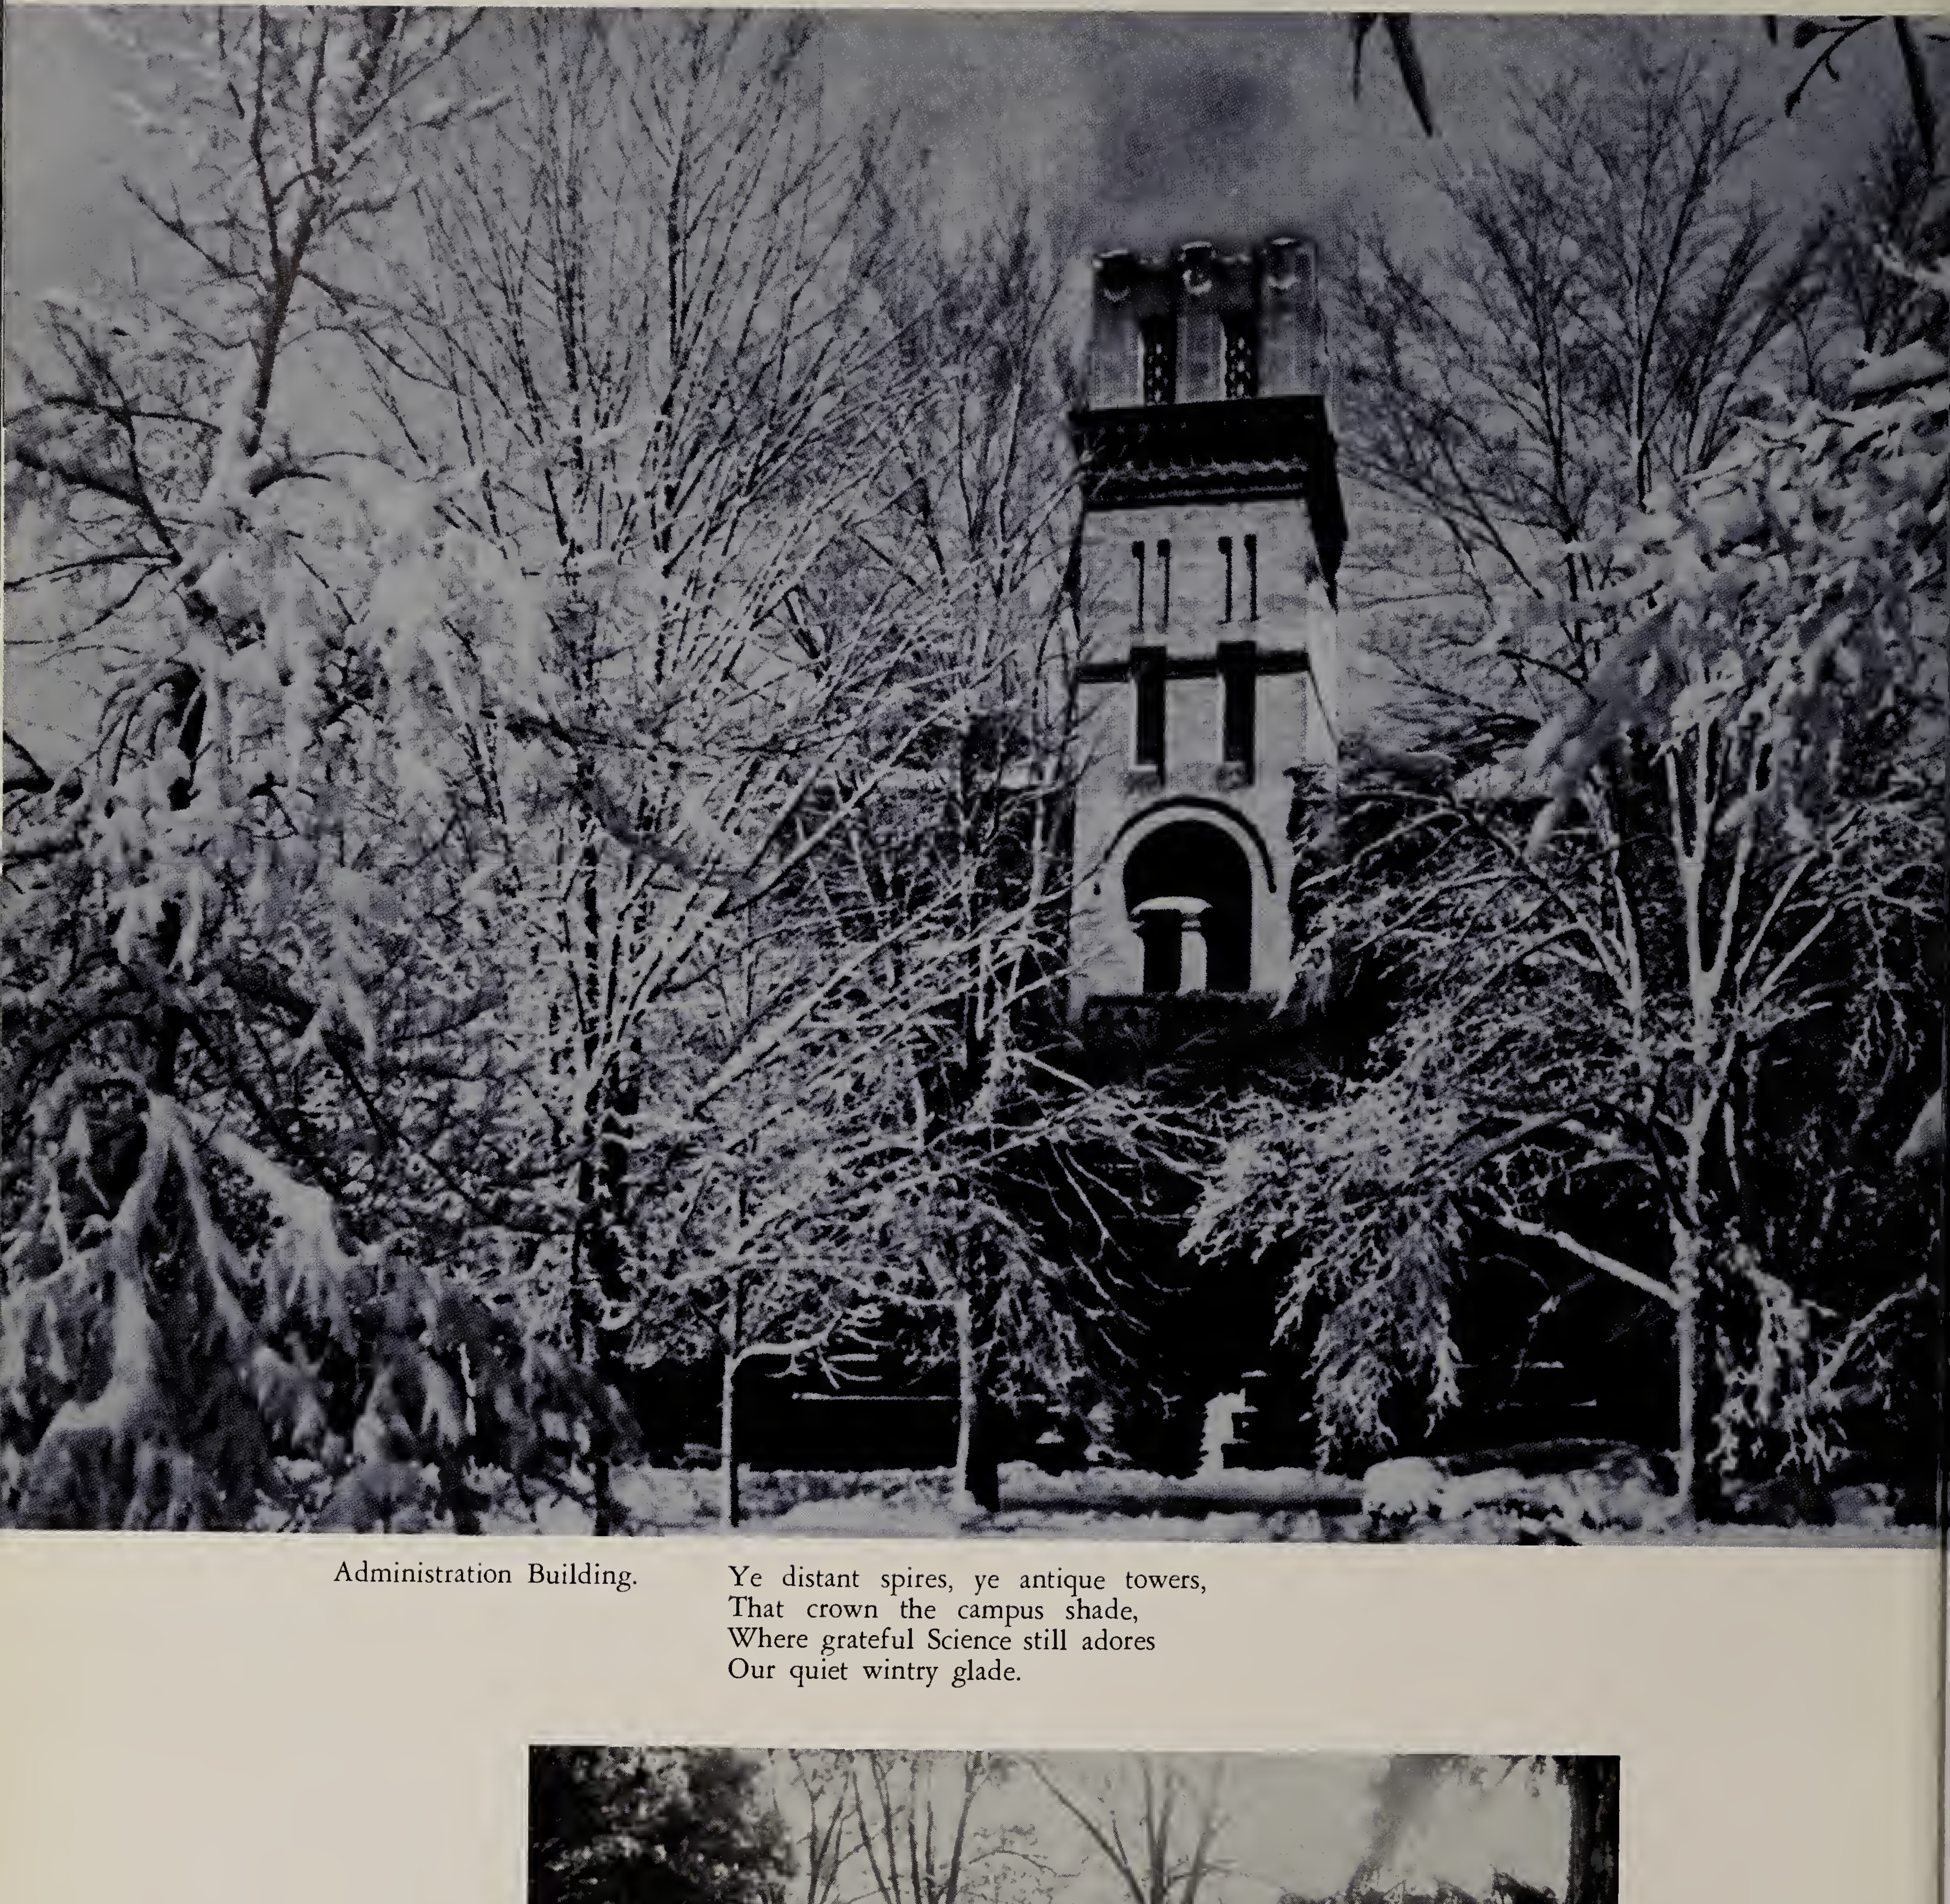
The Ad building after the fire.

High school work was offered by academies, and small privately-owned normal schools trained most of those who became teachers in the central west.

May 2, 1911, night raiders.



A Shakespearean drama set on the outdoor stage.



Administration Building.

Ye distant spires, ye antique towers,
That crown the campus shade,
Where grateful Science still adores
Our quiet wintry glade.

Campus walk

Calm was the day, and through the trembling air
Sweet breathing wind did softly play,
A gentle spirit, that lightly did delay
Hot Titan's beams, which then did glisten fair

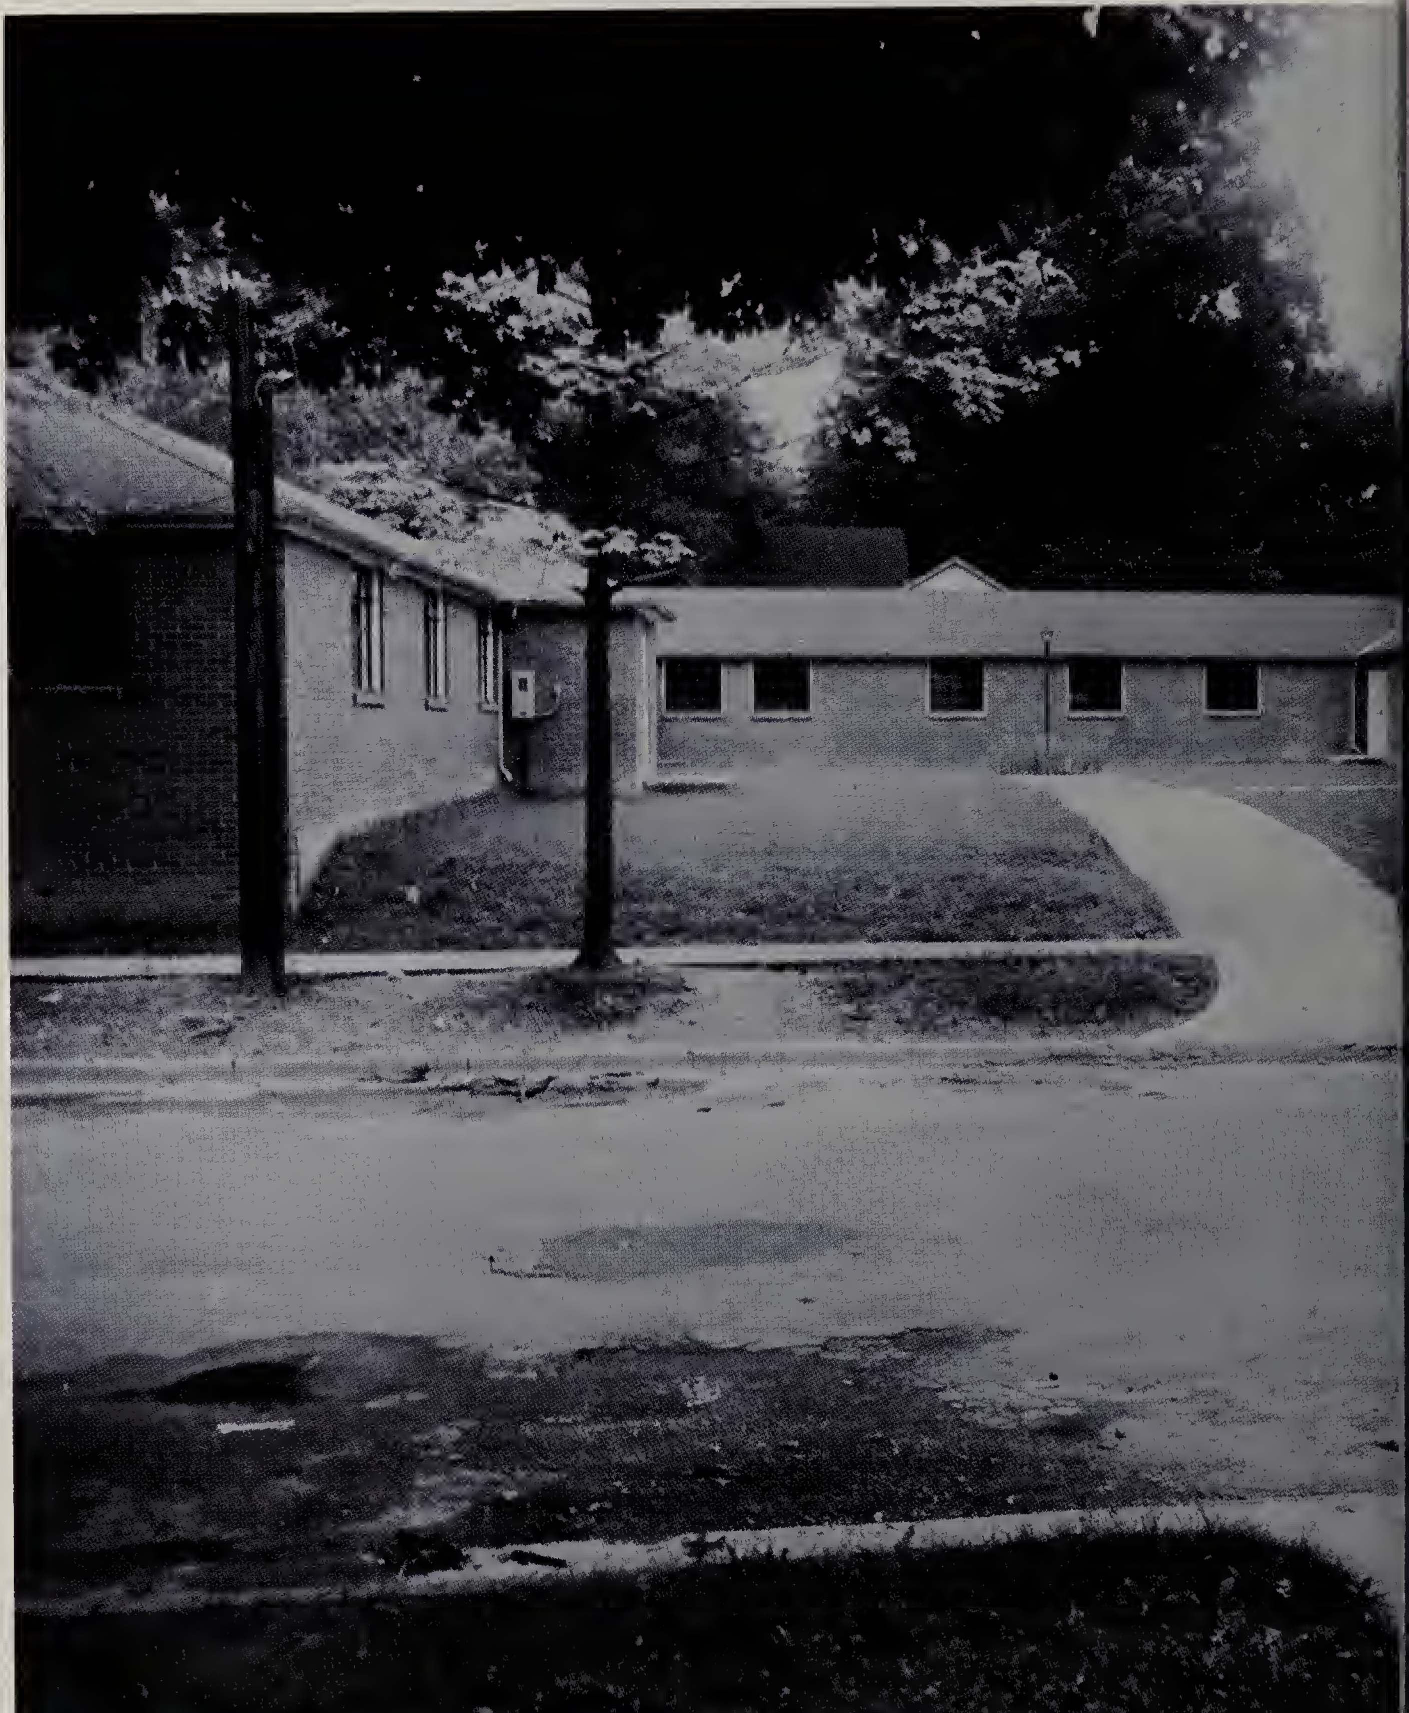
In the heart of downtown Angola where East meets West and North greets South.

The sweeping campus walks add grace to the ivy-covered halls in the center of Campus Hill.

The lower campus at the end of the day.

Tri-Stan housing project which supplies quarters for both single and married students.

The Chemical Engineering Building was completed in 1949. It contains two drafting rooms, physical chemistry laboratories, chemical engineering unit operations laboratories, offices and storage rooms.



THE PRESENT . . .

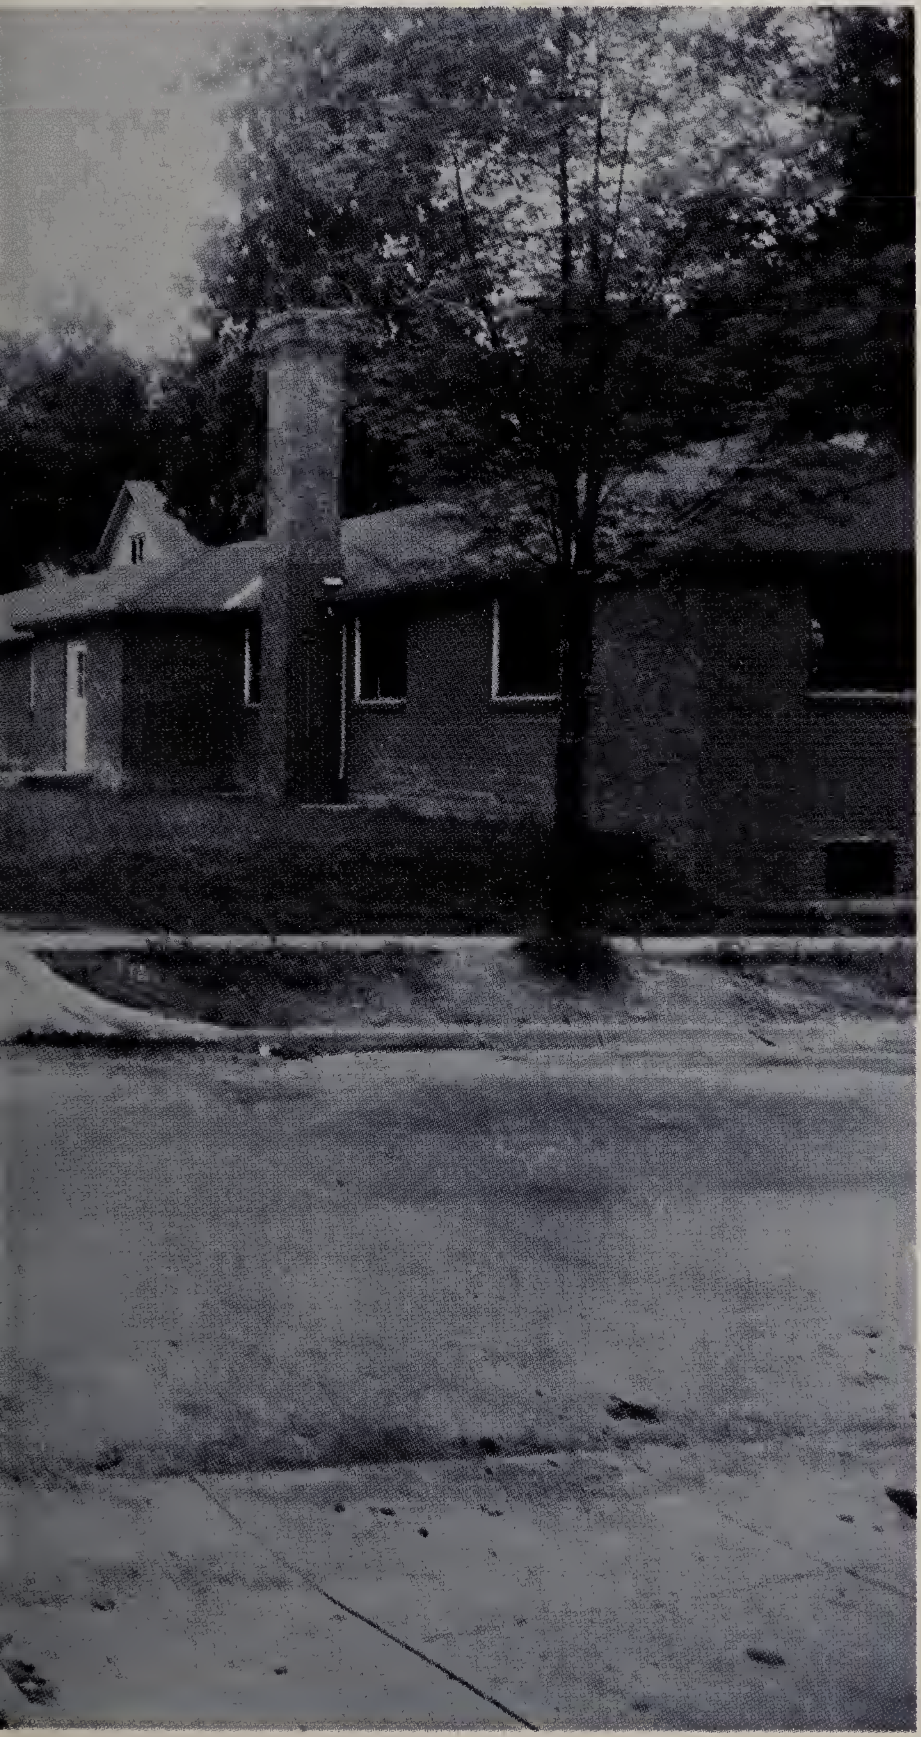
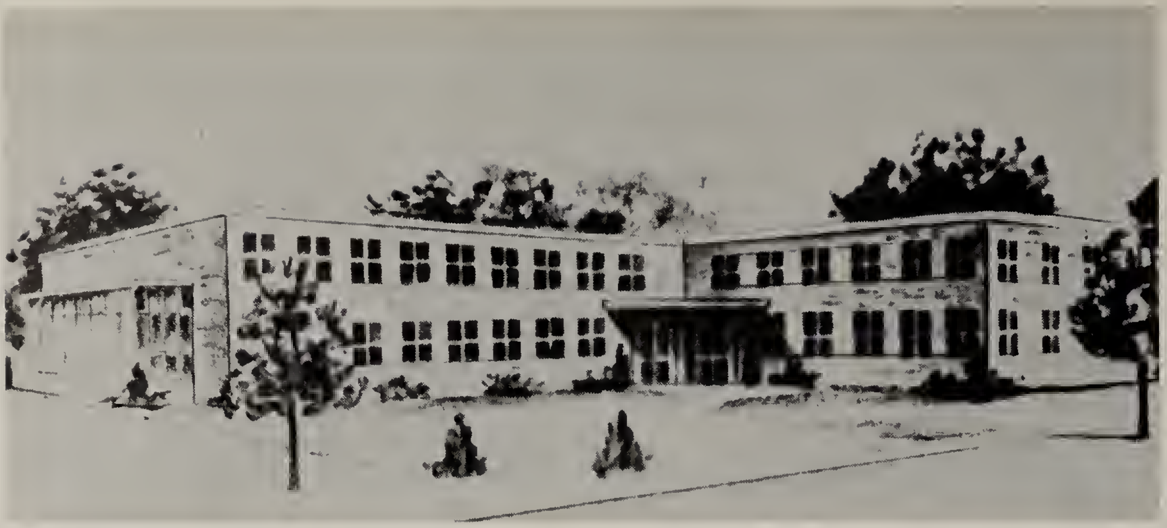
Faculty Homes
Athletic Fields

The Engineering Building, resplendent in all its grandeur, is the home for those who are the firsts on our campus. It houses civil, electrical, and chemical laboratories, drafting rooms, and classrooms.

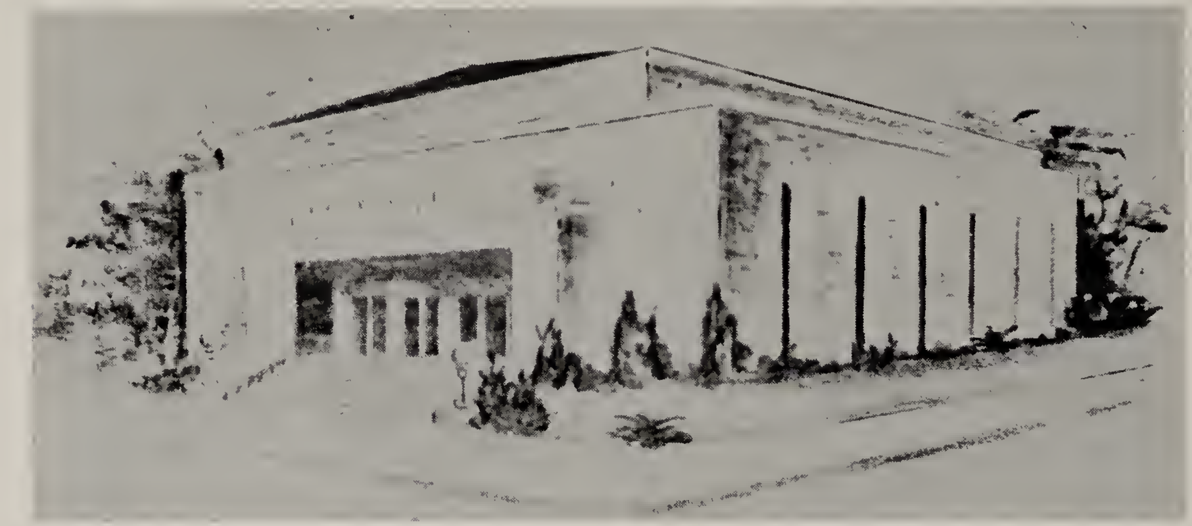


Completed in 1884 the Commerce Building has challenged many an artist's eye.



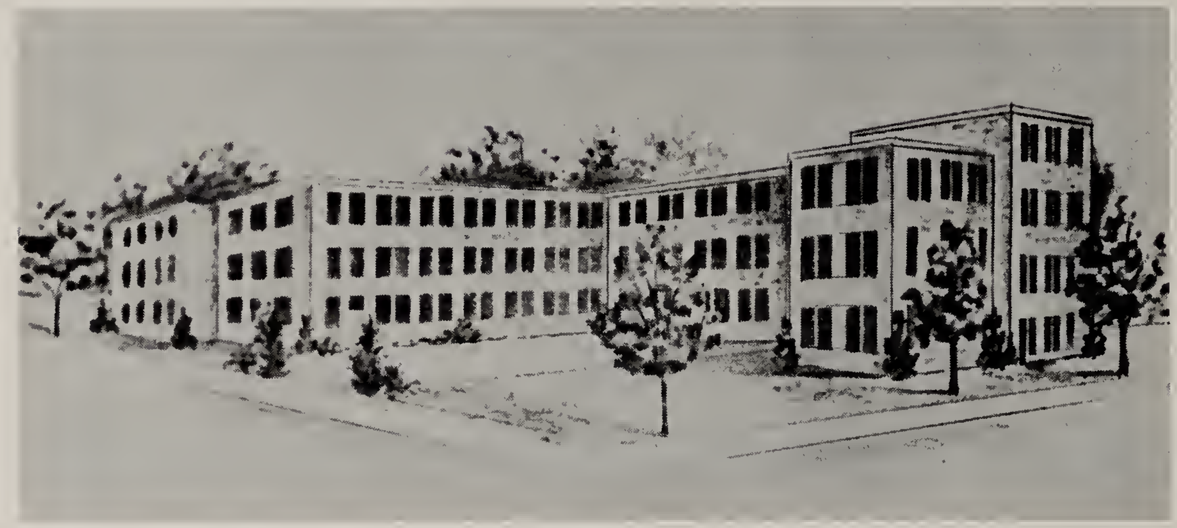
A Classroom-Laboratory Building.

To provide needed classroom and laboratory facilities for basic subjects, such as English, speech, mathematics . . . to relieve general congestion in present campus buildings and open the doors to more students.



A Gymnasium-Auditorium.

To provide a place for college and community convocations and athletic events. To accommodate local, regional, and national professional society meetings and other special interest student activities.

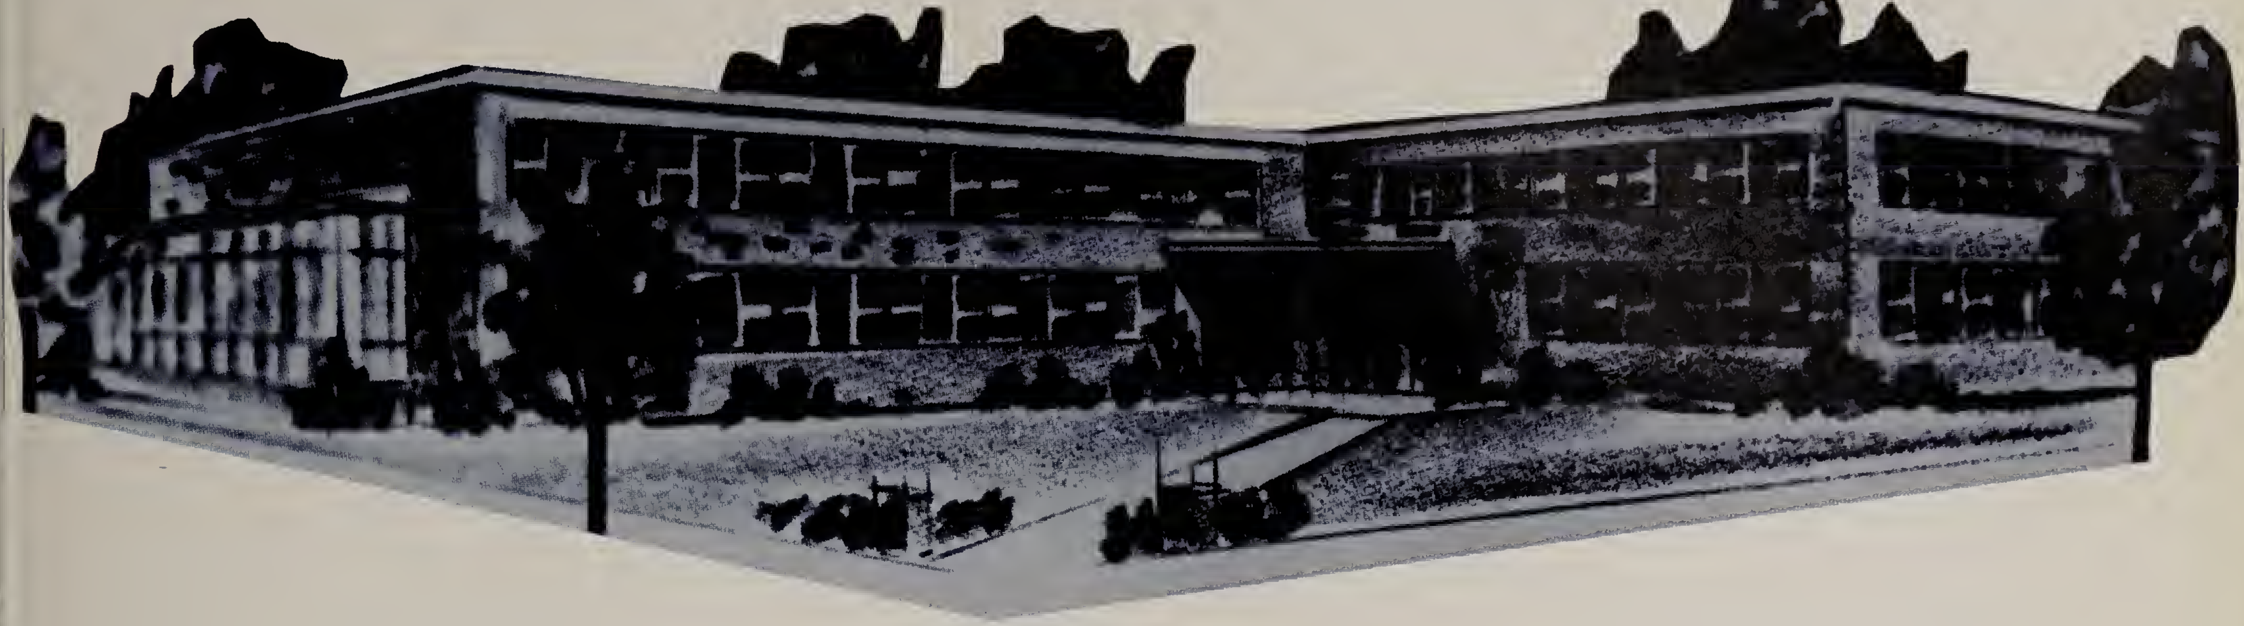


A Men's Dormitory.

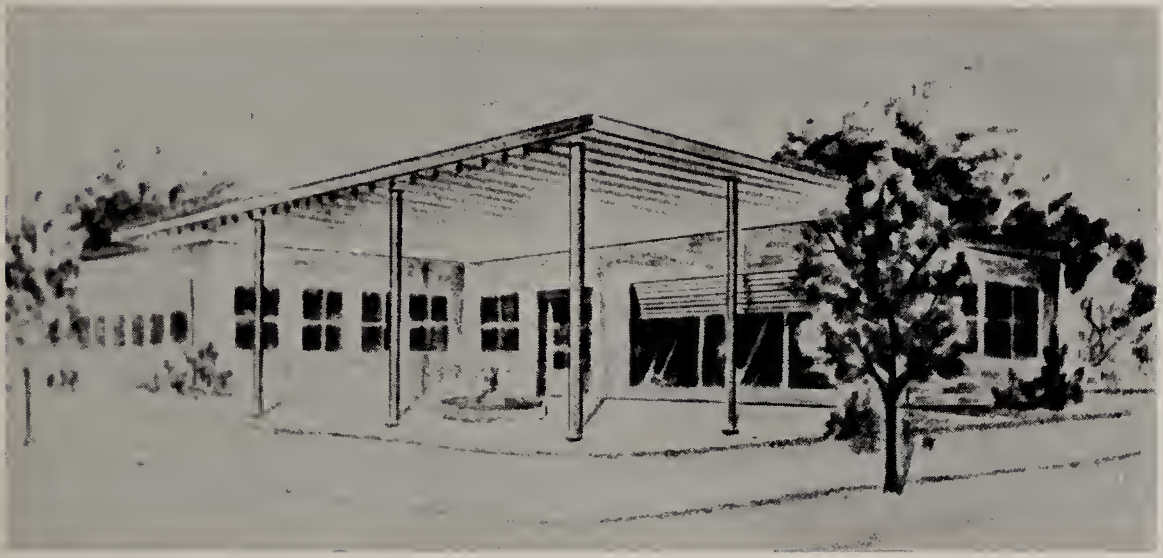
To ease the housing shortage and to give more young men the opportunity to participate in the unique educational advantages.

Dorm A and Dorm B. A part of the FUTURE in action. Each dorm houses 100 students.

A New Library . . . will provide the needed shelf space and facili-

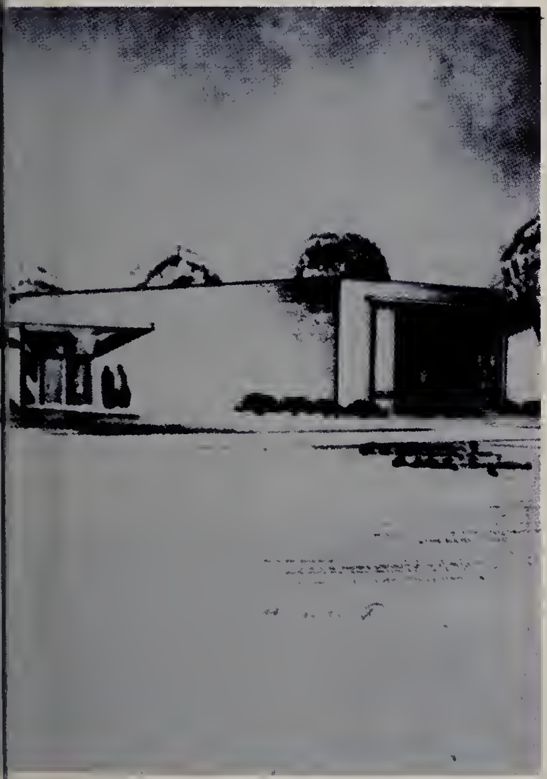


A Physics Lab and Classrooms; Faculty Offices and a Lounge—Books are the traditional tools of the scholar and laboratory experiences are an essential part of the learning process in scores of subjects. The student must master the facilities in laboratories as he works out for himself the understanding he must have of his chosen field.

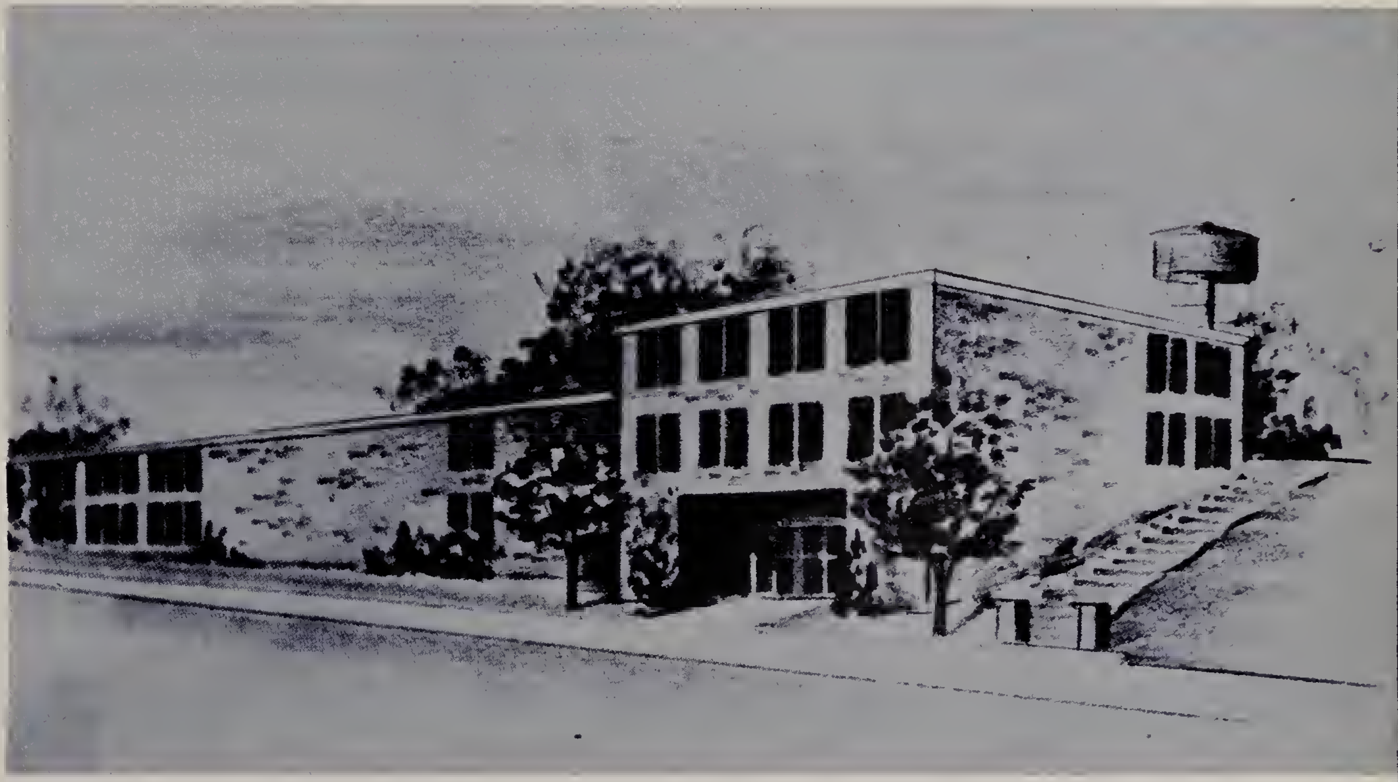


The Student Center

To provide a place where the student body—representing many nations, creeds, colors—can gather in a common interest, demonstrate Democracy at work and enrich their cultural life and professional training.

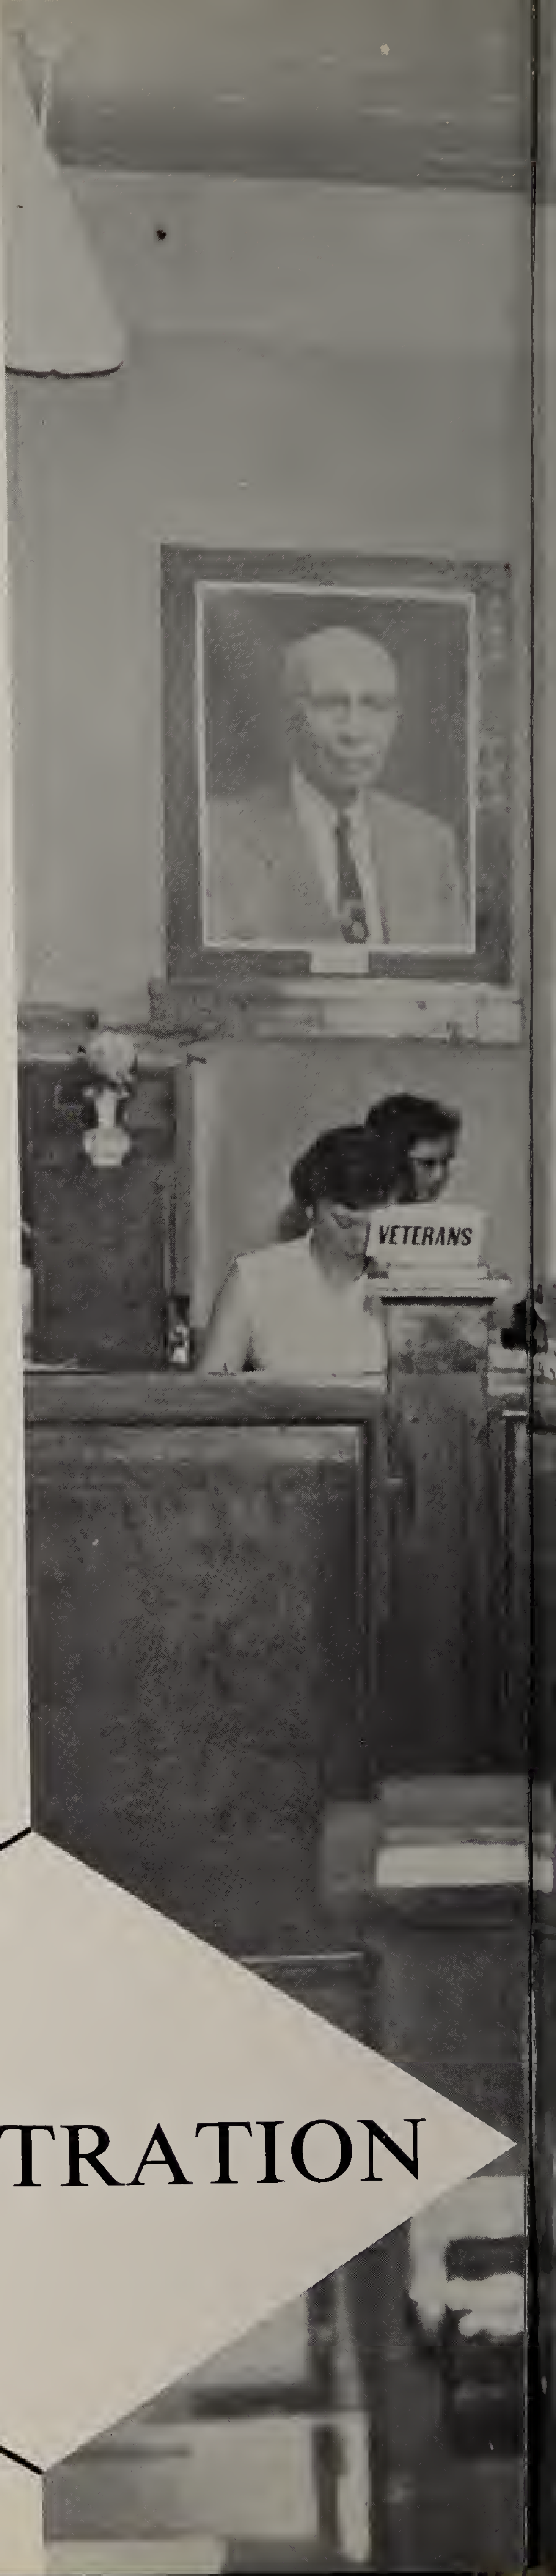


ties for increased storage space, study, and instruction.



A New Civil Engineering Building

To house new equipment, improve and broaden departmental offerings, strengthen instruction.



ADMINISTRATION

Dr. Theodore T. Wood, President of Tri-State College.

TO THE GRADUATES:

"Pride in Accomplishment—Confidence in the Future!" These words express the theme of the 75th Anniversary which the college is celebrating this year. They likewise serve as the underlying thought and intent of this annual publication, acting in cooperation with all in the appropriate celebration of this significant event.

So these words may also serve as a motto for those who are graduating during the 75th year of the existence of Tri-State College. Each of you has completed your educational program at the college, and you should rightfully take great pride in this accomplishment. The remainder of your life and the whole world are before you, providing unlimited opportunities to apply the education you have had. Approach these years and these opportunities with confidence in your ability to contribute services which will make this a better world in which to live.

As the president of your college, I avail myself of this last opportunity to tell each of you that I am proud of your accomplishment and confident of your future. Congratulations and every good wish for your happiness and success in the years ahead.

Theodore T. Wood
President

DR. JOSEPH E. WILLIAMS
Vice-President,
Academic Affairs

Dr. Williams
President Wood
Prof. Moore

PROFESSOR GERALD H. MOORE
Vice-President, Public Relations

DR. PERRY T. FORD, Chairman, Board of Trustees, Tri-State College.

TO ALL ALUMNI—PAST, PRESENT, AND FUTURE:

This year is the Seventy-Fifth Anniversary of Tri-State College. It is fitting that we pause "in the hurried rush of life" to pay tribute to the institution that held and still holds its door ajar so that the worthy and willing student may enter.

The history of Tri-State is replete with achievements of men in public life, prominent in industry, in learning, and in business who subscribe allegiance to the Alumni of a great institution with pride.

As we retrospect we are made to wonder what dreams and aspirations inspired the founders when they dared to invest their time and efforts in an "Institution of Learning" in a veritable wilderness.

It is not presumptuous to imagine that they were beset with trials, vexations and elements of uncertainty. But their faith and convictions prevailed to a point where, in their lifetime, they witnessed some of the fruits of their efforts and counted as compensation the success of men and women in every walk of life who, having passed under the guidance of a dedicated faculty, now smile with gratitude and thankfulness for having passed this way.

Those who have spent time and effort on the campus in pursuit of a common goal know what it means to feel the companionship and friendliness of others. This feeling is borne of hard work where the foundation for the future is laid.

This attitude is carried on into his life's work where he converts his dream to the common service of mankind. Yes—this is a rich heritage.

Achievement in college is not an end in itself but a means to an end. By well-rounded living as a student he attains something new from each thing he does that will complete the final measure of his efforts.

We, of the Board of Trustees, have a strong conviction and a deep faith that the Tri-State student of today measures up to the high standards set by the founders and maintained by succeeding executives and faculty, and that he will continue their quest for the better and finer things of life.

What does the future hold?

When we attempt, in a humble way, to try to visualize the future for Tri-State, we envision a bright diadem in the galaxy of schools to which we can point with pride and satisfaction.

There is now on the trestle board a plan for expanded facilities on the campus that will tax the best efforts of every loyal Alumnus and friend. The dreams of the founding fathers will be surpassed as mounting thousands of students seek the portals of the "Open Door."

May we look forward with faith to the culmination of an achievement worthy of high purpose and hard work to the benefit of all who share our interest.

Sincerely,

Perry T. Ford

Perry T. Ford
Chairman, Board of Trustees
Tri-State College

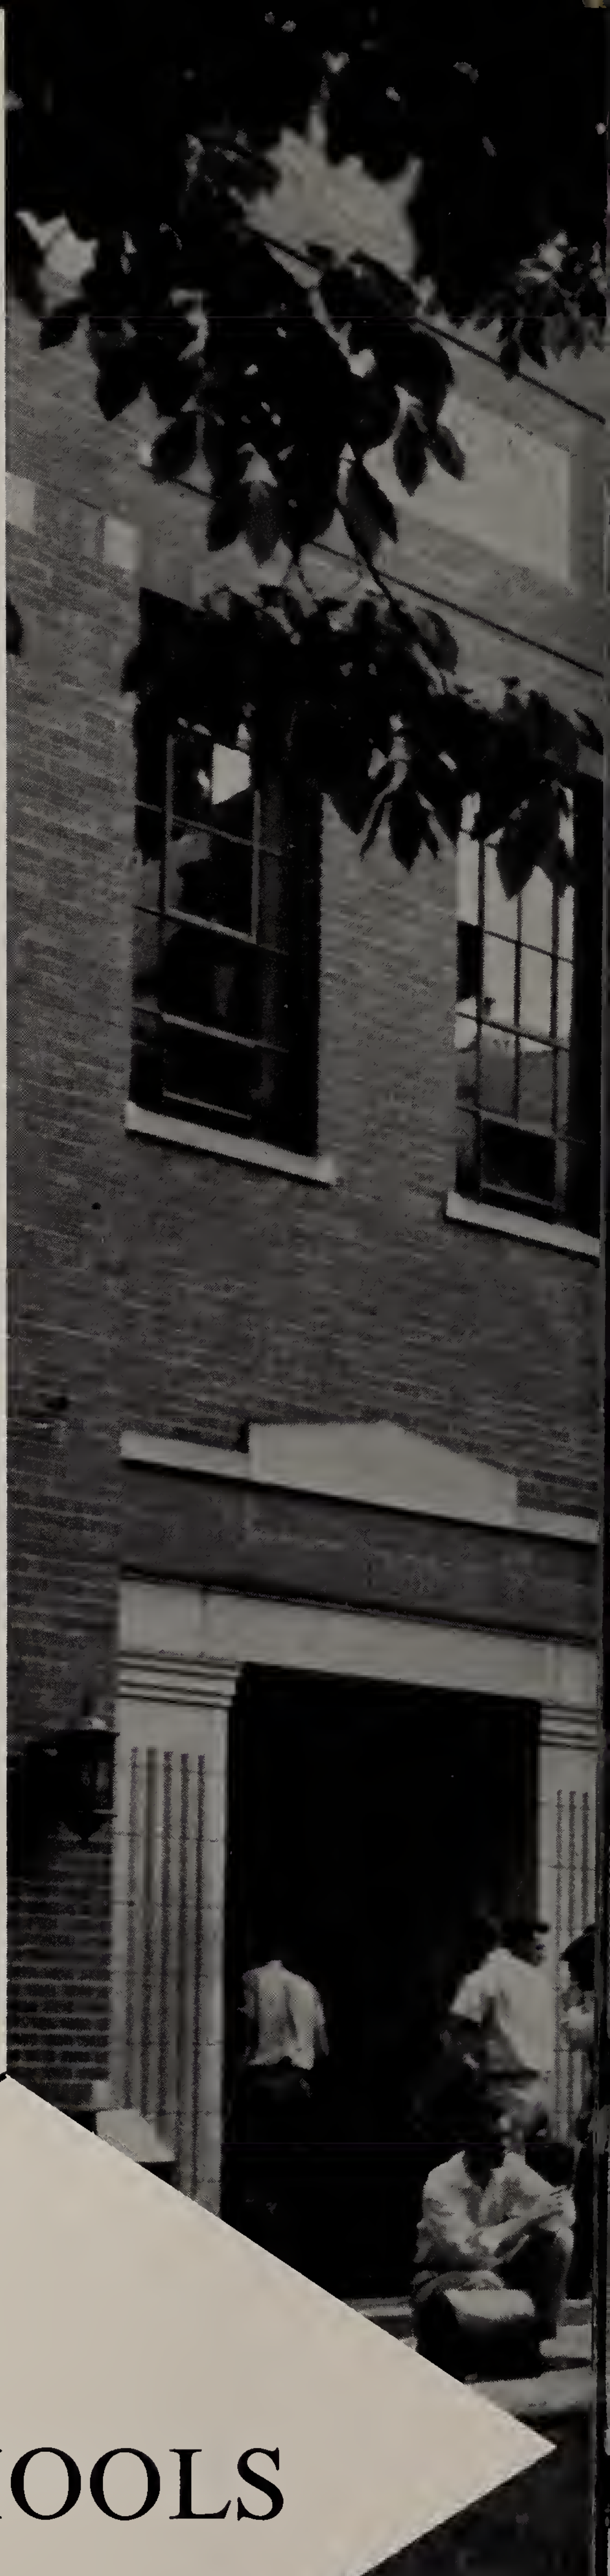
SCHOOLS



SCHOOL OF ENGINEERING

When the School of Engineering was established in 1902, it was officially listed as Civil and Mechanical Engineering.

Within the last fifty-seven years the School of Engineering has expanded to the point where it now offers each student the opportunity to concentrate in practically any field of modern engineering.

This abundance of offerings has paralleled the continuing growth and increasing importance of the engineering profession in our industrialized society.

The purpose of the School is to provide an educational environment which will give each student the many qualities characteristic of professional engineers.

DEPARTMENT OF AERONAUTICAL ENGINEERING

The Department of Aeronautical Engineering was established in 1931. Since 1931, the department's growth has kept pace with the growth of the aircraft industry and now has enrolled over 170 students.

The student is provided with a thorough knowledge of basic aeronautical and engineering theory, but the course is kept sufficiently flexible to allow the student to keep pace with developments in the field of aeronautical engineering.

The theory of the classroom is tested by practical application in the department's modern wind tunnel. The wind tunnel at Tri-State College, constructed in the 1930's, was one of the first to be erected on any college campus.

DEPARTMENT OF CHEMISTRY AND CHEMICAL ENGINEERING

DR. KENNETH SLAGLE
Professor, Chairman of
Department

Chemistry was taught for many years by the teaching staff in the School of Pharmacy. In 1912 a course was offered which led to a degree in chemical engineering. The chemistry laboratories were housed in what is now the college print shop.

Since 1912 a large demand for chemical engineers has been created by the industrial and scientific developments in the United States. It is the purpose of this department to train men adequately to assume executive positions in the field of chemical engineering.

The immediate plans for the future include the objective of keeping all courses constantly improving, and covering adequately those courses required for accrediting by the Engineers Council for Professional Development and the American Institute of Chemical Engineers. The department hopes, at some date in the future, to offer a degree in chemistry as well as in chemical engineering.

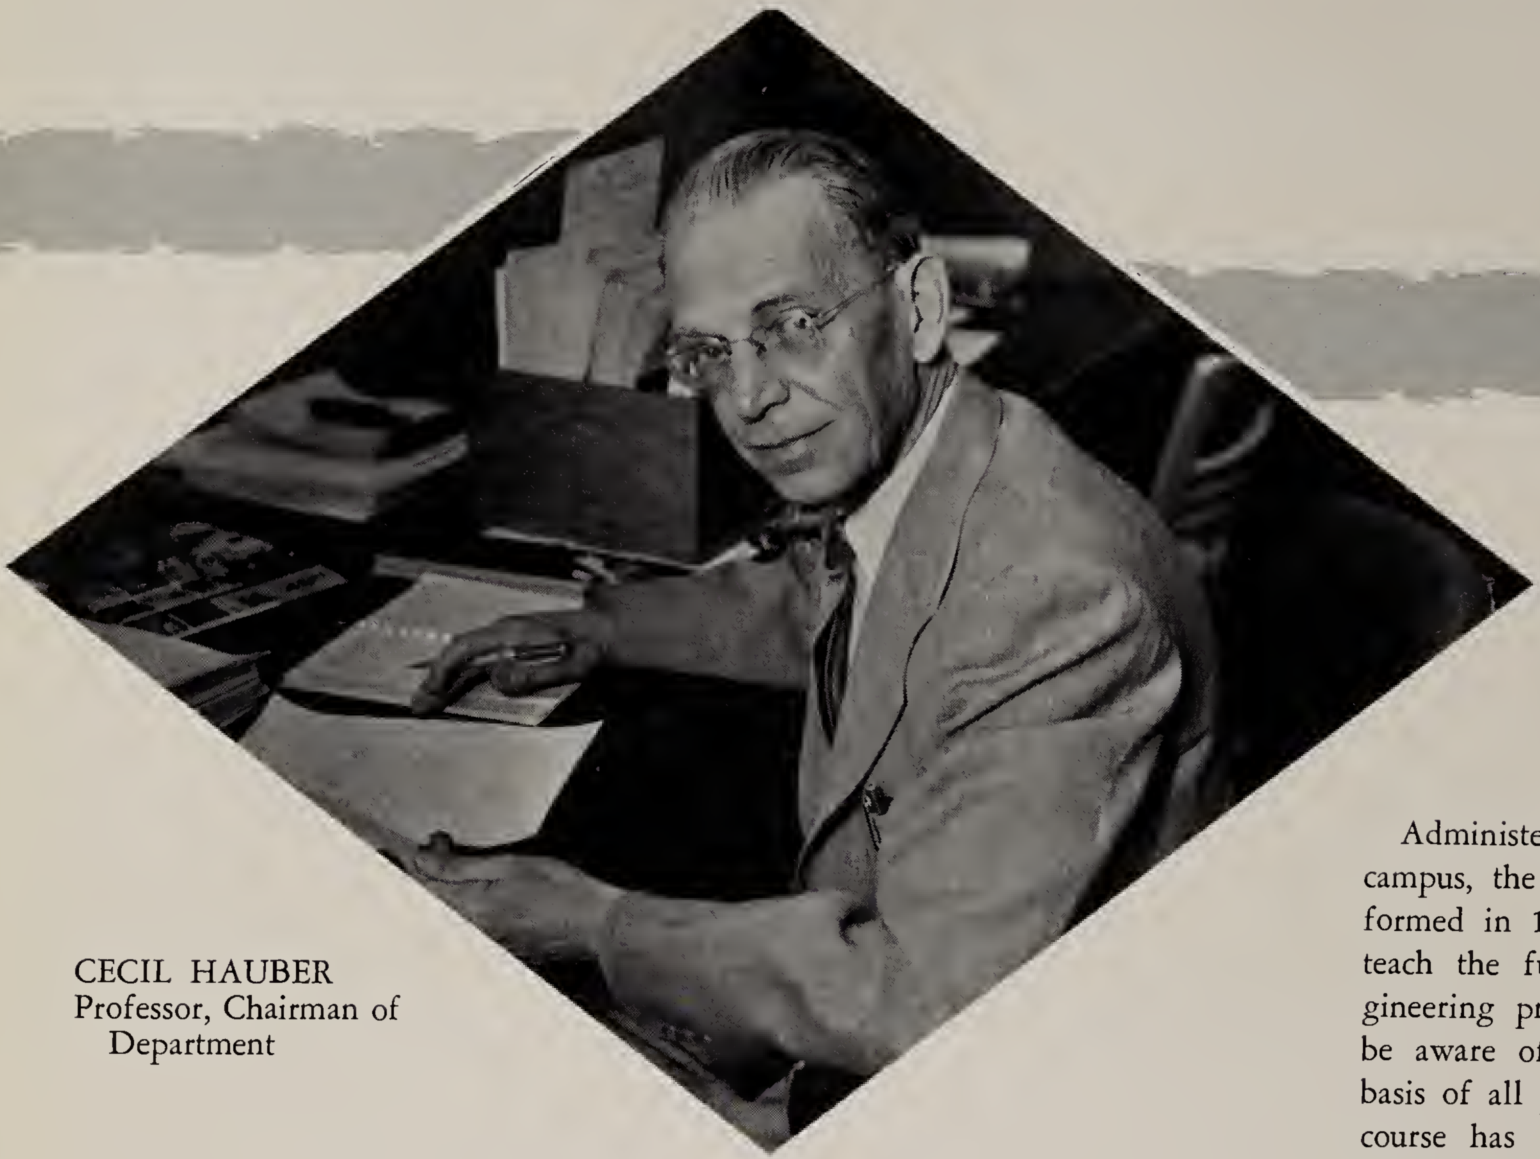
DEPARTMENT OF CIVIL ENGINEERING



CECIL HAUBER
Professor, Chairman of
Department

Administering the first engineering course on campus, the Civil Engineering Department was formed in 1902. The course was designed to teach the fundamental principles of civil engineering practice and to cause the student to be aware of the importance of theory as the basis of all practical engineering problems. The course has been considerably extended in the 57 years of its existence.

The probable future changes in engineering education seem to dictate that this course be even more broadened and extended as we continue to change from the operational aspect of engineering to the scientific aspect.

DEPARTMENT OF ELECTRICAL ENGINEERING

LELAND S. AX
Professor, Co-Chairman
Department of Electrical
Engineering

CLYDE E. SHAW
Professor, Co-Chairman
Department of Electrical
Engineering

The Electrical Engineering Department was organized at Tri-State in the early 1900's. The Board of Directors offered, to those entering engineering professions, a program concentrating on engineering fundamentals, with classes meeting the year around.

William Albert Pfeifer was department head for many years, and his inspiration attracted qualified men and strengthened the department. The leadership of Samuel D. Summers and Milford A. Collins carried the department into the post World War II era and influenced the present curriculum.

Further change is needed. Future plans call for a more basic, scientific approach to electrical engineering teaching with a proper balance between classroom theory and laboratory techniques.

L. Worden, Instructor; H. I. Hutto, Assistant Professor; L. G. Hanson, Instructor; A. E. Eberhardt, Assistant Professor; M. E. Hall, Instructor; Mr. K. Sawa, Instructor; E. Velez, Instructor.

DEPARTMENT OF MECHANICAL ENGINEERING

JOHN C. HUMPHRIES
Professor, Chairman of
Department

The Mechanical Engineering Department graduated its first student in 1910. Since this early beginning, the course has intended to give each graduate a thorough training in fundamental principles. The field of Mechanical Engineering is essentially basic, borrowing as it does, fundamentals from all other fields of engineering, and permeating all of our present day industrial world.

Upon completion of the course, the student is well prepared to take his place in any phase of mechanical engineering. Indeed, the basic nature of a good mechanical engineering course can be said to form the groundwork for many types of work in almost any industry.

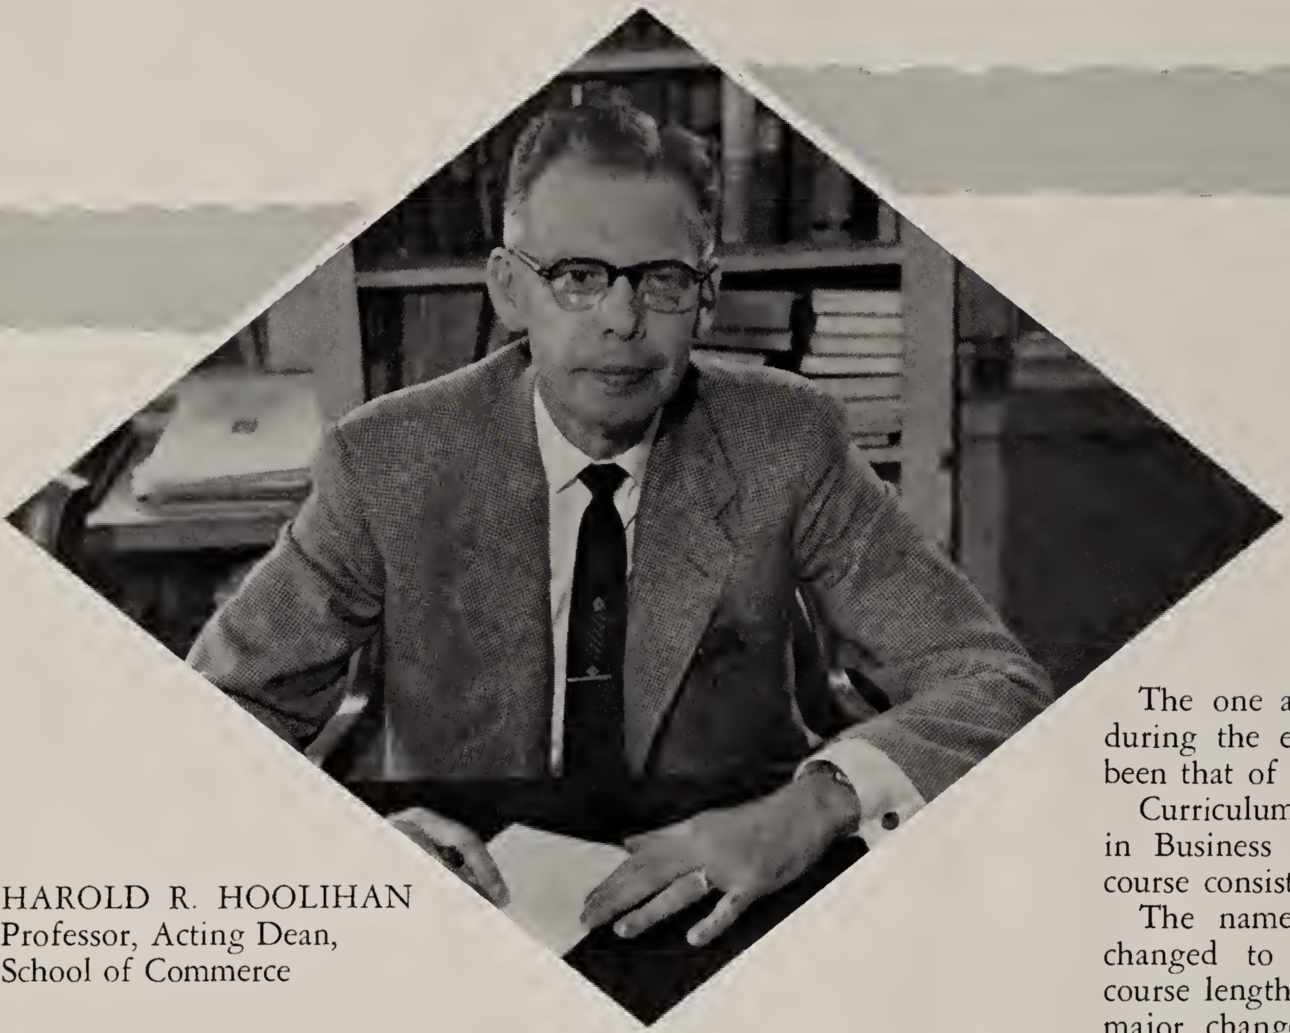
SCHOOL OF COMMERCE



HAROLD R. HOOLIHAN
Professor, Acting Dean,
School of Commerce

The one area of studies that has been available to students during the entire seventy-five years of Tri-State operation has been that of commercial or business subjects.

Curriculum in General Business can be traced back to one in Business Administration that was offered in 1927. This course consisted of six quarters work.

The name of the course in Business Administration was changed to General Business for the year 1956-57. The course length was extended to twelve quarters at that time. The major change in the newly instituted curriculum was the inclusion of three to four quarters of subjects in the Liberal Arts area.

The objectives of the present curriculum in General Business are to give the student both a general educational background as well as work in the different business areas of a professional nature, thus giving the student preparation for the supervisory and administrative positions of the business enterprises of tomorrow.

W. G. Mundy, Associate Professor; R. I. Cook, Associate Professor; W. Champion, Associate Professor; R. H. Ramsey, Professor; B. J. Mummert, Associate Professor; C. E. Hallawell, Assistant Professor.

MOTOR TRANSPORT

Upper: DR. EVERETT W. SCHADT, Professor, Chairman, Department of Motor Transport Management.
Lower: C. L. HILTON, Associate Professor; A. VOLOTTA, Assistant Professor.

The Motor Transport Management department was organized in 1955. The program was planned as a four-year course leading to a Bachelor of Science degree in Business Administration.

The development of the department was given support by Mr. Perry T. Ford, former chairman of the Ohio State Highway Department and Mr. Roy Fruehauf of the Fruehauf Trailer Company who gave it its initial backing with 96 scholarships. Eight other scholarships were also granted during the planning stage. Three were awarded by Expressways, Inc., of Angola; two were offered by the Aero Mayflower Transit Company; two were offered by Federal Express, Inc., of Indianapolis, and one, the Perry T. Ford Scholarship, was given by the C & J Commercial Driveway of Lansing, Michigan.

At the present time approximately 20 scholarship students are enrolled. In June, 1959, the first Senior Class was graduated.

The purpose of the program is to foster motor carrier education by providing specialized courses at the college level and to stimulate the interest of students in adopting a career in the industry.

ACCOUNTING

H. W. HOOLIHAN, C.P.A. Professor
R. W. PUFAHL, Assistant Professor.

Bookkeeping, and later professional accounting, has been offered continually by Tri-State College during its seventy-five year history.

The first Accounting Department was established in 1928 with a six-quarter curriculum. In 1956, when all curriculums of the School of Commerce were placed on a four-year basis, the accounting curriculum was extended to twelve quarters.

The objectives of this curriculum are to give the student a broad educational background of Liberal Arts and General Business, in addition to the technical skill and philosophy of the practicing accountant.

ENGINEERING DRAWING AND DESIGN

SHERMAN F. DREYER
Professor, Chairman of
Department

Realizing that the practicing engineer must fully understand the techniques of drawing and design, the Engineering Drawing and Design Department acts as a service department to the school of engineering.

Presently, the course fulfills two major functions. Not only does it allow regular students in engineering to take advanced drawing and design courses, but also enables students interested in drafting to pursue a special thirty-six week course in drawing and design which enables them to enter industry as well-trained draftsmen.

S. S. Radford, Professor; T. Minter, Professor; G. Granger, Instructor.

DEPARTMENT OF ENGLISH AND SPEECH

PETER F. HOLUB
Professor, Chairman of
Department

In 1923 Dr. Alice Parrott and a few students informally established the English Department. Although English classes were offered in the liberal arts and teacher training courses, no specialized technical writing courses existed.

For the next five years no English was offered to Engineers because of Miss Parrott's absence. In 1928 she returned and formally organized the Department of English in the Engineering school. Two years later the Commerce department asked that its composition classes be combined with those of the Engineering school. This latter move formed the framework for what is now the Department of English and Speech.

From these small beginnings the departmental offerings grew until now a student can complete 25 hours of work toward his requirements for graduation. The department hopes, by offering courses in literature and advanced composition, to bring the course offerings to 35 hours. Another future hope of the department is to direct through its versatile faculty a foreign language program.

F. W. Howard, Instructor; E. L. Huddleston, Instructor; E. B. Orlosky, Instructor; M. D. Carney, Professor; E. G. Little, Assistant Professor.

DEPARTMENT OF MATHEMATICS AND ENGINEERING MECHANICS

PAUL A. NURNBERGER
Professor, Chairman of
Department

Organized and administered as a service department to the School of Engineering, the Department of Mathematics and Engineering Mechanics emphasizes both the theoretical and the practical aspects of mathematics as it relates to engineering and to science.

Recognizing that mathematics is a foundation course for most subjects of an engineering curriculum, the student is given ample preparation for specialization in pure mathematics, applied mathematics, or mathematical physics, and at the same time is given a foundation for his future studies in all phases of engineering.

First Row: C. Becker, Professor; D. Tichenor, Instructor; M. Rose, Professor; H. Whittern, Assistant Professor; M. Smith, Instructor; V. Gorecki, Instructor; G. Anspaugh, Associate Professor.
Second Row: A. A. Hockey, Professor; R. K. King, Instructor; Dr. R. N. Kramer, Associate Professor; G. Rowley, Assistant Professor; C. L. Davis, Associate Professor; R. A. Butler, Associate Professor.

DEPARTMENT OF PHYSICS

JOHN TRESSLER
Assistant Professor,
Acting Chairman of
Department

The Physics Department was instituted in 1921 with an enrollment of 100 students. In the beginning most of the teaching was done by advanced students. Since then, however, the department has progressed to one with the purpose of giving the engineering student the necessary fundamentals of physics before he enters the advanced phases of his engineering program. The department also gives to the general education student a panoramic view of the field to enable him to take his place in society as a responsible citizen. Upon completing the courses offered, the student will be able to read intelligently the current newspaper and magazine articles concerning scientific events.

By expanding its laboratory facilities and equipment, the department hopes to offer the student a greater variety of laboratory experiments. A modern physics course which will give the engineering and general education student another tool in keeping abreast of the scientific times is also being planned.

C. Kenyon, Associate Professor; W. Johnson, Assistant Professor; P. Eble, Instructor; A. Fowler, Instructor.

HONORARIES

SKULL AND BONES, C.O.A.

The election to this honorary for campus leaders is the highest honor that can come to a man at Tri-State. No other group enjoys the prestige of Skull and Bones, C.O.A., a national honor society that first appeared at Tri-State in 1948.

Since its beginning, 231 Tri-State leaders have been initiated into the society, and have enjoyed the respect of their fellow students, the faculty, and the college administration.

An Open Letter To The Student Body From The President Of The Student Council

For the past few months, there has been talk of revising the Student Council into a more efficient, more workable, more equitable organization. At the beginning of this quarter, Skull and Bones conducted a partial survey of some two hundred and twenty-two students on the question of their representation on the Student Council. On the basis of this sample survey, it was found that 51.6% are presently being represented on the Council. You can readily see that since less than half the students are not being represented, according to this sample poll, there is a great need for a revised council to have representation of all students and to work more efficiently.

As a result of a meeting of the presidents of all the organizations on campus, held February 3 (you can check the last issue of Tri-Angle for complete details) a committee was named to prepare a new constitution for the Student Council. The members of the committee, composed of the six members of Skull and Bones and the presidents of the Student Council, Alpha Beta Alpha, Tau Sigma Eta, and the Inter-fraternity Council, met to discuss the new organizational structure and the constitution necessary to make the new organization workable.

After several long meetings, highlighted by long and heated arguments on various phases of the issue, the committee came up with the proposed new constitution for the revised Council.

The job now rests in your hands. At the last meeting of the Student Council, each representative was given a copy of the new constitution and a letter of instruction to be given to his organization's president. Since I am limited in space, I cannot go into all the changes in the council, but believe me if you will, we spent many long hours in polishing this revised constitution to perfection and I'm sure you will be pleased with it upon reading it. That's what I'm asking you to do—to read the revised constitution—it's all for your benefit, and it's up to you.

At the first meeting in the spring quarter, of the Student Council to be held on March 30, at 4:00 p.m., in room 213, your organization's president is asked, in the letter of instruction sent to him, to attend this meeting in place of the regular representative. This meeting will be devoted chiefly to the discussion of any questions your organization has about the revised constitution and to voting on the acceptance of this constitution. Anyone interested is invited to attend this meeting of the Council. Any organization on campus that does not have a copy of the revised constitution and a letter of instruction, may obtain these by notifying me by placing a note in the Student Council mail box, in the Activities building. I will immediately get you whatever copy you're missing.

I'm sure you feel as I do, that there is need for a great improvement in our present Council. I think this is that big step to make this needed change. I hope to see all the presidents at that first meeting of the spring quarter and I hope to see this revised constitution ratified.

It's for you—by you—and for your benefit.

FRANK W. RACZEK
President of Student Council

Honorary Societies

Skull and Bones Proposes Revision Of Council

Aim Is Toward Better Student Government

In an attempt to bring to Tri-State a workable student government, Skull and Bones, COA, will present to the Student Council at its next meeting a plan by which a revision of the present Student Council can be effected. To be successful, Skull and Bones will need the full cooperation of the student body, particularly the officers and members of those organizations presently enjoying representation on the Council. The initial stages of the program will be essentially fact-finding, and will attempt to determine who is—and is not—represented on the Student Council.

This proposed reorganization is not a revolt against the existing Student Council, its officers, or its members. The officers on the Council have long felt the need for revision. The honoraries, the departmental societies, the fraternities, and the student body at large have all indicated at one time or another, that something should be done to strengthen and to unify our student government.

Skull and Bones is confident that reorganization will result in a unified governmental structure which will insure adequate representation for all students at Tri-State. Obviously, the reorganization can only be effective if

Three Named To Skull And Bones

By John Prell

Newly elected members of Skull and Bones this fall are Paul Henry, Lloyd Henderson, and Patrick Conlon. These men have proven themselves as worthy campus leaders, while maintaining high standards of character and personality. They are very able men scholastically and extra-curricularly.

Paul is a Mechanical Engineering student, while Pat and Lloyd are majoring in Motor Transport Management. They have a long list of activities and accomplishments to their credit, for the betterment of Tri-State College.

Students may have wondered and asked many times: what is Skull and Bones, C.O.A. and what does it do? This article will try to tell some things about the organization, and the men in it.

Essentially, Skull and Bones is an honorary leadership society. Its purpose is to recognize outstanding student leadership, to promote student activities and school spirit, to promote to the highest degree the tradition, honor, and prestige of Tri-State College. Skull and Bones is an organization that has been around a long time and is national in scope.

The purpose of Skull and Bones explained more fully is: "To recognize outstanding student leadership: membership in Skull and Bones is a high honor granted, by election by the members, only to those who have proven themselves worthy and outstanding leaders on the campus. This means each of you as a student must be active and do something extra. Skull and Bones has certain minimum requirements for membership. These requirements are not out of reach, but few people put forth enough effort to reach them. The members themselves exceed the minimum 2 or 3 times.

2. To promote student activities and school spirit: to promote to the highest degree the traditions, honor, and prestige of Tri-State College: Skull and Bones has in many ways accomplished these things. For the past few years, keeping the Modulus alive has been a major project in Skull and Bones.

"Some Skull and Bones accomplishments will have a direct effect on you, as a student, and you will realize that these things have been done. But you won't even give a second thought as to how or why these things came about," states an organization spokesman.

"Aren't there a few more students who desire this highest honor on Tri-State campus? Most people take a lot of pride in accomplishment, but at present

Presidents of Campus Organizations Accept Student Council Revisions

Council Requested To Act On Ratification Beginning Spring Quarter

Skull And Bones Pleased By Progress

At a meeting on February 3, presidents of twenty-five campus organizations, meeting with officers and members of Skull and Bones, COA, unanimously accepted a proposed revision of the Student Council's organizational structure. Also present at this meeting were all officers of the Student Council, and George Rowley, Student Council faculty adviser.

Three Elected By Skull and Bones

At an initiation banquet at Gracie O'Shanahan's in Coldwater, Michigan, on March 6, three students were accepted into Skull and Bones, COA, in recognition of leadership displayed on campus.

The newcomers to the national leadership society are Arthur A. Agnew, Jr., Norman W. Chornenki and Edwin F. Ludwig.

Tom Critton, Marcus Hayes,

Skull And Bones Strives To Complete Modulus

With the cooperation of a number of interested students, Skull and Bones, C.O.A., has accomplished the revision of the Student Council. The members of Skull and Bones are confident that the new council will meet the expectations of the student body as well as the administration.

Now that the revision has been completed, the ten members of Skull and Bones are concentrating their efforts toward the completion of the 1959 Modulus.

Tau Sigma Eta, the Honorary Engineering Society, was founded on campus in 1950. Its purpose is to recognize and to promote scholarship in the School of Engineering and to initiate projects that will be beneficial to the college.

Students who maintained an average of 3.1 honor points or more during four consecutive quarters and who have carried a minimum load of 20 hours per quarter and who have received no more than 5 C's are eligible for membership. An honor point ratio of 3.0 must be maintained for a member to remain active in the society.

Presently the society operates the used book store at the beginning and end of each quarter. Tau Sig members have also set up a tutoring service for engineering students.

Because of their ideals and activities, Tau Sigma Eta members are admired and respected by both students and alumni of Tri-State College.

Alpha Beta Alpha, the Honorary Commercial Society, was founded in 1938 by two of its present faculty advisers—Harold and Howard Hoolihan. The purpose of A.B.A. is to create an enthusiasm for scholarship, to promote worthy leadership, and to encourage the development of character in students of the School of Commerce at Tri-State College.

To become eligible for consideration the student must either maintain an average grade of "A" for a period of four consecutive terms or an average grade of "B" for six consecutive terms with not more than 2 "C's" during that period. Students meeting the requirements of character, leadership, and scholarship are then initiated into the society.

The vocational achievements of A.B.A. alumni demonstrate the caliber of men and women recognized by this Commercial Honorary Society; it serves as a goal for all students in the Commercial Department.

TRI-STATE STUDENT DIRECTORS

The Student Directors was founded in 1954 by former Dean Lawrence P. Myers. Members are selected from the schools of Commerce and Engineering on the basis of leadership, dependability, cooperation, and scholarship. They must show a desire to promote the welfare of the college.

The function of the Student Directors is to assist the Dean of Students during Orientation, Registration, Baccalaureate, Commencement, and Alumni Day.

At graduation, the members of this honorary organization receive an award bearing the seal of the college and the signature of the college president.

ACTIVITIES

INSTITUTE OF THE

The Institute of Aeronautical Sciences was founded on a national basis in 1932, and the Tri-State branch was begun in 1940. The original objective of the Institute was "to advance the art and science of aeronautics." The Institute has since broadened its objectives to include "astronautics," and now strives to provide an interchange of technical ideas among aeronautical engineers throughout the world.

Professor Rose and Aero crew operate wind tunnel scales during test.

Airplane demonstration lecture in the Aero lab.

Not only are student members allowed the use of an extensive reference library in New York, but are given special rates on I.A.S. publications through the Journal of Aeronautical Sciences, aviation's leading technical publication. Professional membership after graduation is automatic to the student member, and the usual entrance fee is waived.

By showing films relating to the Aeronautical industry and by inviting prominent speakers to its meetings, the society provides the aeronautical engineering student with a glimpse of the practical application of his college training.

AERONAUTICAL SCIENCES

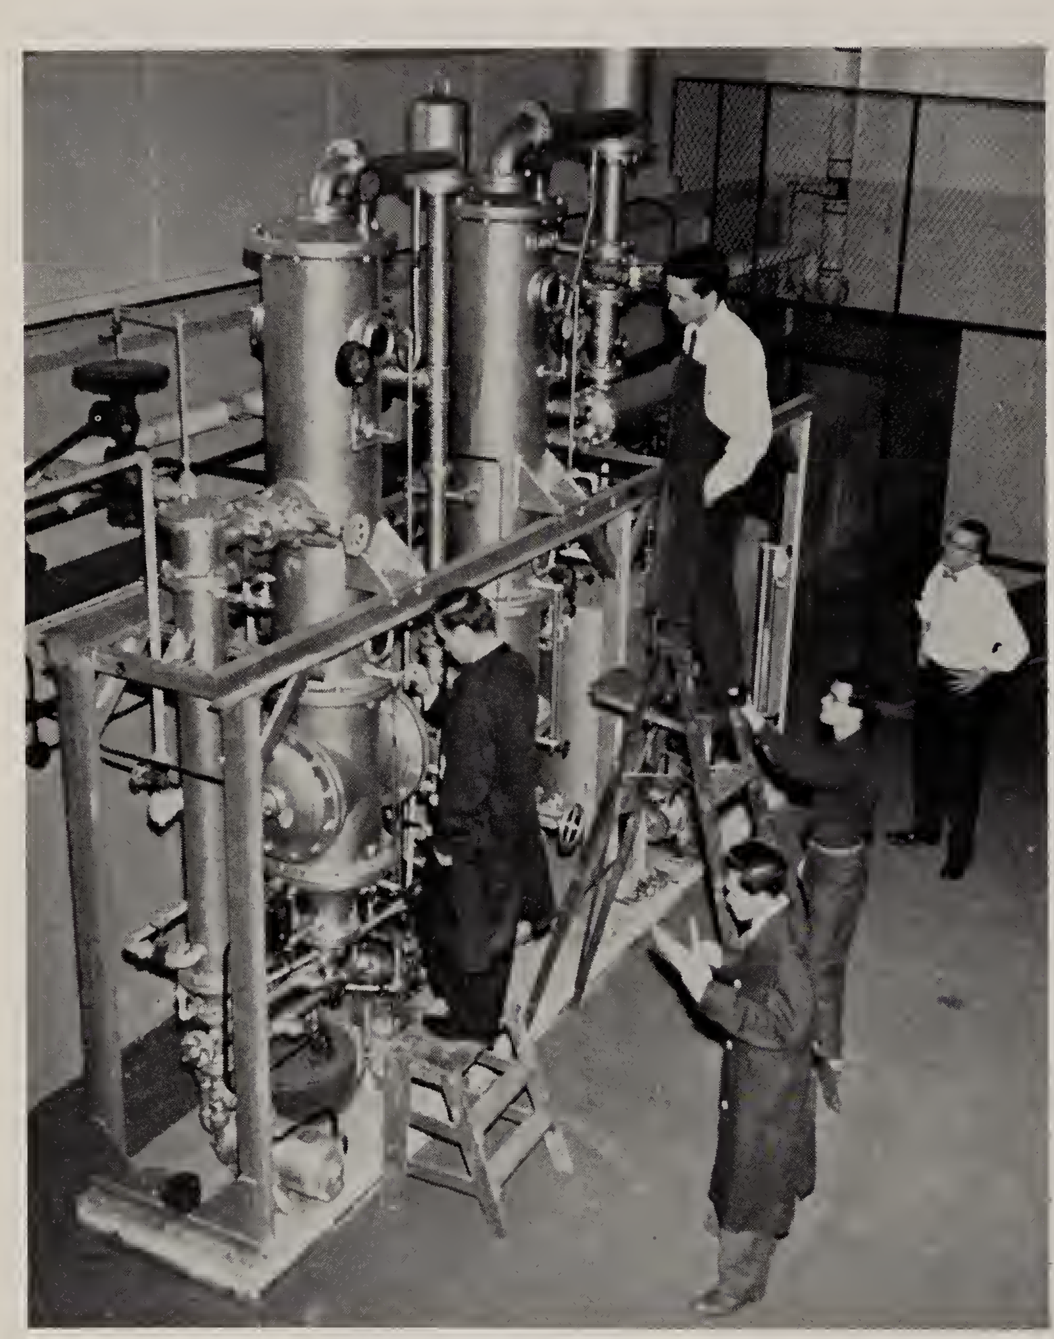
STUDENT AFFILIATES OF THE



Chem Engineers keep constant vigil while dangerous chemicals are prepared in the lab.

The campus affiliate of the American Chemical Society, consisting of students enrolled in the Department of Chemical Engineering, was formed in April, 1948.

Through the media of guest speakers, of field trips to such places as the Argonne National Laboratories, and of appropriate films, the society achieves its main purpose—to acquaint the chemical engineering student with the professional aspects of his career.

The immediate goal of the Chemical Society is to gain another major prize for its display during the coming 75th Annual Alumni Day, and add it to the three prizes it has won over the past three years.

Chem lab students weigh elements and compounds on delicate scales.

Fourth Row: G. Stahlman, F. Szmigielski, J. Gomez, A. Stefani, B. Plank, K. Grams, J. Nieter, H. Rolfe, W. Beckman, J. Walkup, J. Provost, M. Best.

CIVIL ENGINEERING SOCIETY

In 1902 our engineering school was composed of two departments: a civil and mechanical. Through the years, a general engineering society was formed on campus for students in any field of engineering. As new departments were added to the engineering school, the general engineering society remained.

In the mid 1930's, the general society was dissolved, and each department formed its own society for students majoring in its field. The Civil Engineering Society was one of the first to be formed under this departmental reorganization, and is one of the oldest departmental societies on campus enjoying continual existence.

Since its 1930 beginnings, the Civil Society has offered to each student of civil engineering an opportunity to gain an insight into the actual working practices of the civil engineer working in industry and government.

First Row: A. Grimaldi, J. Mekus, J. Stoddard, D. Koontz, R. Russell, R. Mammoser, E. Konarski, R. Mead, W. Rinard.
Second Row: L. Cullmann, E. Boughton, T. Martin, C. Railey, F. Gorove, S. Thacker, R. Warner, F. Wagner, D. Vanderwal.
Third Row: H. Peffley, M. Parker, J. Stewart, K. Kope, P. Broskey, J. Clark, D. Lorentzen, R. Bell, E. Lee.

ELECTRICAL

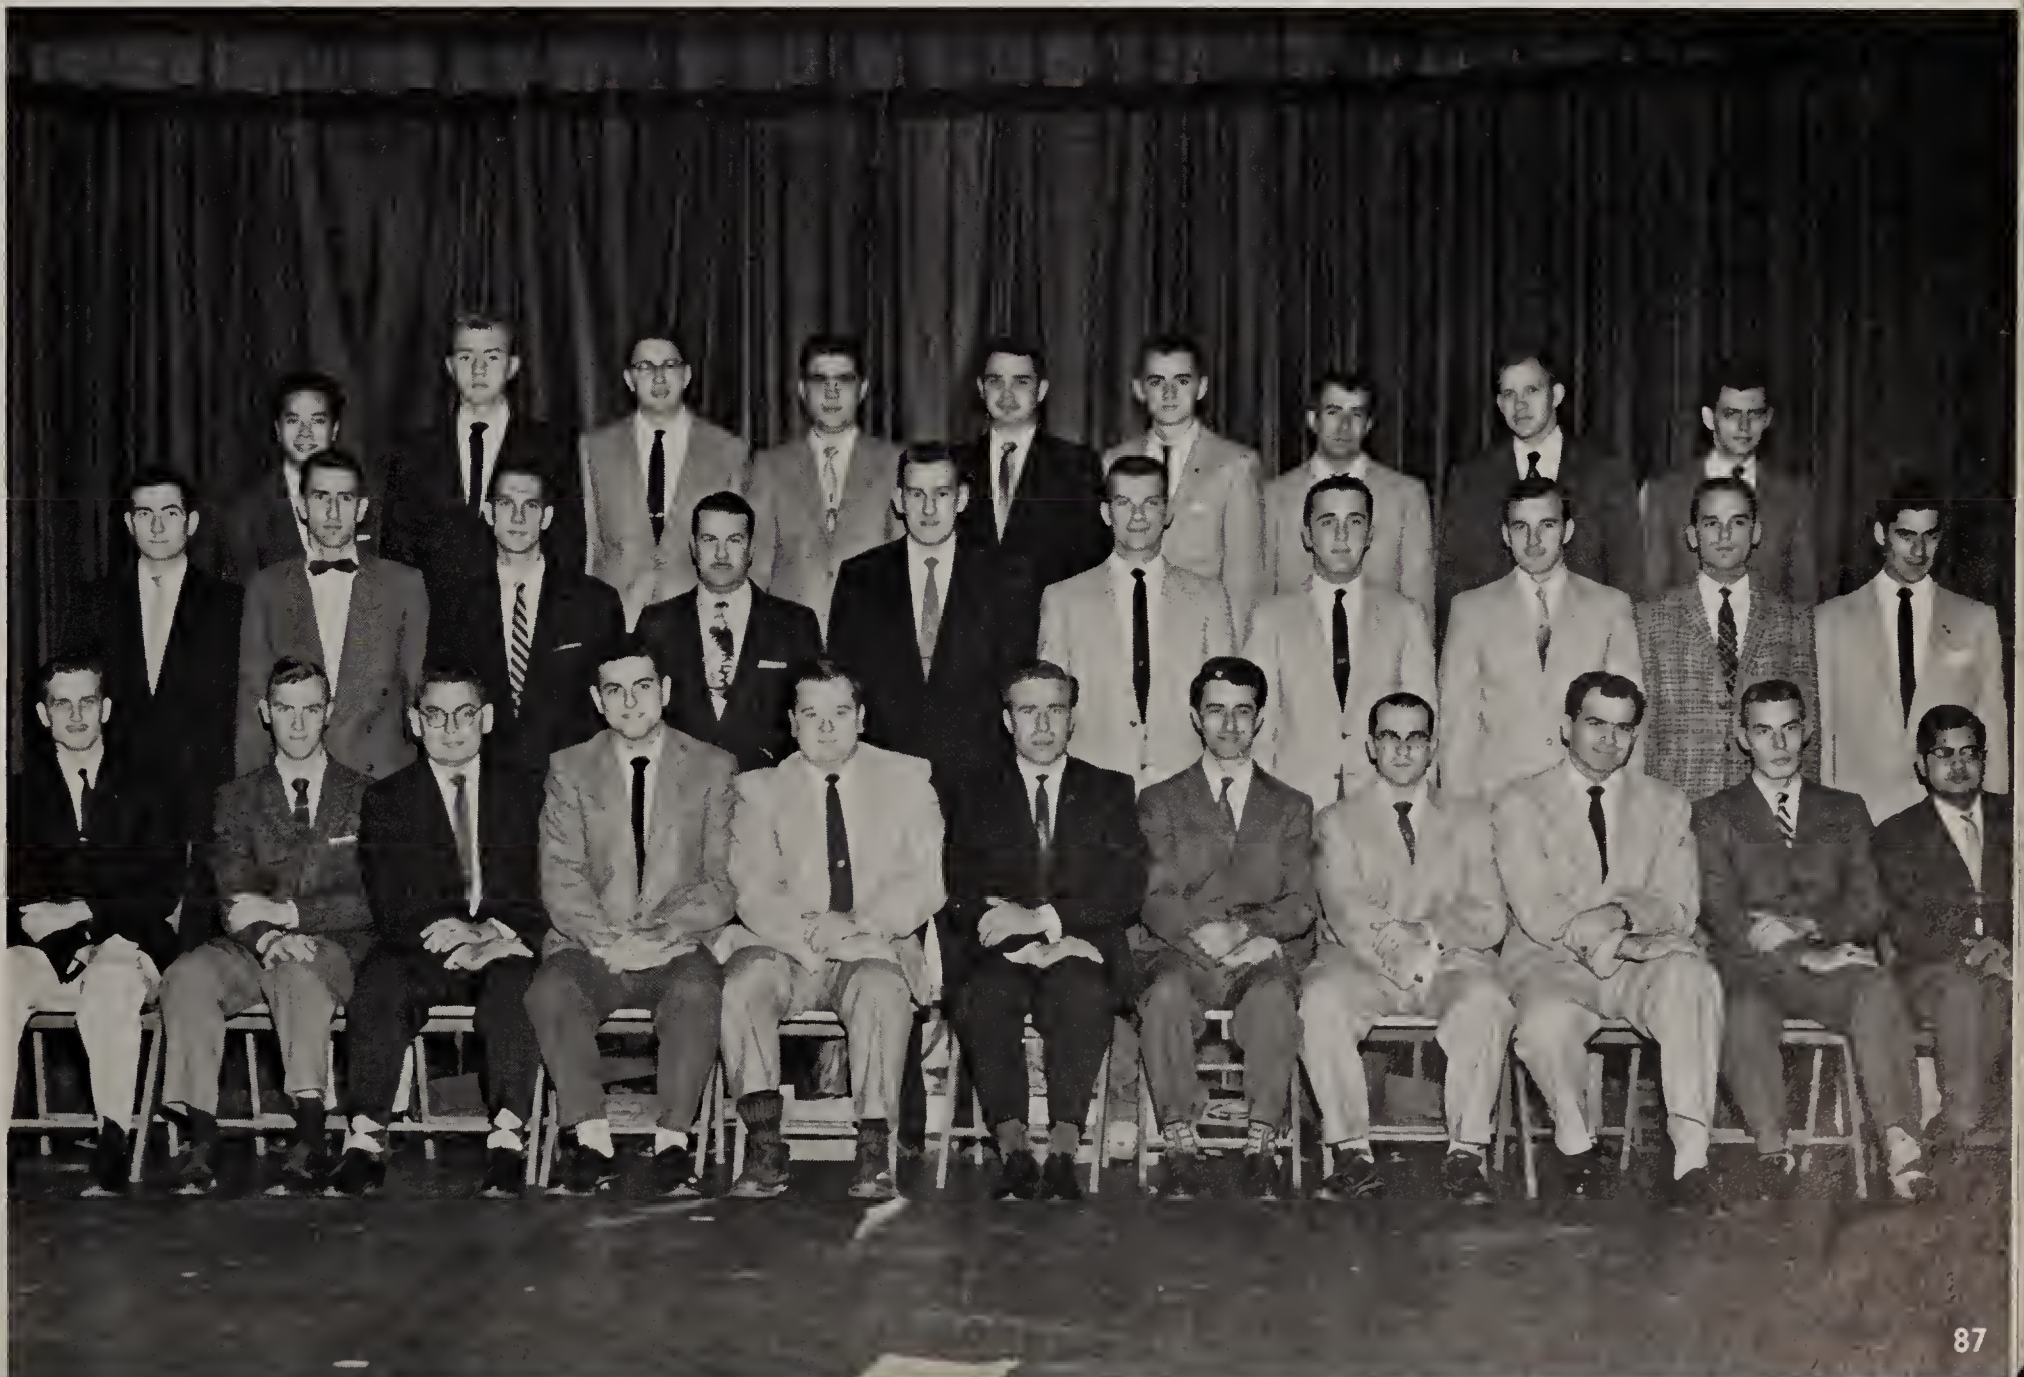
First Row: B. Langley, T. Johannsen, D. Martin, W. Zartman, D. Landau, D. Hursey, A. Clegg.
Second Row: R. Porter, A. McCarty, R. Marshall, M. Lotz, J. Kepenach, K. Sawa, R. Freehling, N. Champa, W. Thaler, E. Dobra.
Third Row: D. Welker, M. Prokopakis, R. Cripe, R. Mrzlack, T. Mazar, T. Fitzgerald, E. Plata, G. Grenzberg, P. Davies, G. Reeves.

The Electrical Engineering Society was formed in 1934. The society is a student organization whose membership is open to all students. The primary aim is to acquaint the members with actual practice in the field of electrical engineering.

The purpose of the Electrical Engineering Society is to promote the social and academic growth of its members. This objective is accomplished through close cooperation with faculty members and industry. Society programs consist of technical lectures, movies, demonstrations, and social activities. Each Spring, the members of the society make a field trip to leading electrical manufacturers where they see the practical application of theories studied in the classroom.

ENGINEERING SOCIETY

First Row: B. Langley, R. Russell, A. McCarty, R. Marshall, J. Pittman, D. Vance, D. Landau, N. Champa, W. Zartman, D. Martin, H. Jhaveri.
Second Row: A. Clegg, T. Mazar, F. Skestone, W. Villwock, T. Johannsen, W. Long, M. Bailey, J. Kepenach, W. Lynch, J. Kiser.
Third Row: R. Dong, M. Lotz, L. Shaum, D. Welker, P. Davies, L. Rudy, R. Cripe, L. Gibson, P. Heroux.



First Row: R. Eilenberger, A. Ziegler, T. Egan, J. Martino, R. Fiser, T. Sigman, W. Haglund, G. Carter.
Second Row: N. Oldfield, J. Crow, W. Warnacut, W. Kreider, J. Galuga, J. Laboy, K. LeMieux, R. Myers.

The Mechanical Engineering Society helps prepare the student for industry. Frequent scheduling of field trips, movies, and speakers, all of which are associated with his classroom studies, enable the student to learn what will be expected of him in industry.

Any engineering student at Tri-State is eligible to become a member of the Mechanical Engineering Society, and the majority of the membership is obtained by canvassing the students enrolled in the Mechanical Engineering Department.

To further its high ideals, the society schedules a field trip each Spring. This field trip, to large industrial concerns in the area, is held in cooperation with all the societies of the Mechanical Engineering Department.

MECHANICAL ENGINEERING

First Row: N. Hesselsweet, B. Cole, G. Darner, G. Patino, J. Davis, J. Cufford, R. Hayes, C. Hosey, S. Conte, B. Limpach.

Society members viewing cutaway model of 1959 automobile.

AUTOMOTIVE ENGINEERS

In 1949, the first meeting of the student chapter of the Society of Automotive Engineers was conducted on the campus. In the short span of ten years, S.A.E., through the close cooperation of its officers, its members, and its faculty advisers, has become one of the most progressive departmental societies on campus.

The aim and purpose of this society is to uphold the creed of the S.A.E. . . . "To promote the arts and sciences of engineering practices connected with the design, construction, and utilization of the automotive apparatus."

It is the objective of the individual member, the elected officer, and the society, that in the coming years, the society will develop to an even greater degree the high ideals toward which it is striving.

First Row: E. Carpenter, W. Schottey, W. Haglund, J. Evans, K. Shelton, R. Volk, C. Almond, C. Kunkle.
Second Row: E. Shriver, T. Hawkins, C. Warner, R. Hayes, S. Conte, A. Cogswell, N. Bosquet, C. Hosey.
Third Row: W. McKenzie, E. Bruning, I. Philbrick, E. Leedy, R. Fiser, L. Beck, A. Hendricks, J. Kuiper.

The campus branch of the American Society of Tool Engineers is an affiliate of National Chapter 56, located in Fort Wayne, Indiana.

Although our branch was organized only in 1955, our goal is to become an independent national chapter in the near future.

The A.S.T.E. offers the student a better understanding of production methods, of procedures, and of controls; it also performs an important function in the education of the Mechanical Engineer.

First Row: R. Zarembka, R. Hayes, W. Ramirez, T. Critton, D. Barton, J. Martino, L. Green, D. Moorehead, C. Demorest.
Second Row: G. Carter, K. Shelton, L. Hunsinger, C. Barnes, D. Bowman, R. Dalm, C. Powell, R. Kopp, J. Lebo, R. Fiser, J. Artman.
Third Row: R. Mann, J. Heppler, R. Flint, F. Whittemore, J. Cohen, R. Cabaj, J. Oliver, N. Oldfield, R. Foster, S. Conte.

AMERICAN SOCIETY OF TOOL ENGINEERS

RADIO ENGINEERING SOCIETY

Established for the purpose of enabling students who are majoring in electronics and its associated fields to gain a useful knowledge outside of their regular scholastic studies, the Radio Engineering Society was organized in 1936.

By presenting at its meetings speakers who are leaders in their field, the society attempts to satisfy its members in their search for higher education coupled with practical knowledge. These speakers, by addressing the group on latest developments in the field, perform the necessary function of adding to the student's practical knowledge.

The Radio Engineering Society's facilities are available to any Tri-State student who is interested in electronics.

First Row: L. Anderson, R. Manhart, R. Blaskis, R. Longsderff, M. Westenhaver, L. Worden, D. Schaff, T. Farrington, A. Mulling, M. Fisher, P. Mitchell.

Third Row: W. Harrison, G. Shaft, F. Cordero, E. Banning, G. Kovach, D. Hay, J. Grimm, D. Watson, B. Shapiro.

MOTOR TRANSPORT SOCIETY

Founded in 1956, the Motor Transport Society is a newcomer on the campus. The objectives of the Motor Transport Society are to provide an insight into motor carrier transportation through the use of nationally known speakers, to promote congenial relations between students which will create permanent bonds of friendship, and to strengthen students' knowledge and use of self-government.

The society, which is composed of students enrolled in the Motor Transport Management course, thus further develops intense interest of its members in the problems of motor truck operations. It eventually hopes to affiliate with a national transportation fraternity.

To supplement the theory of the classroom, the society also arranges for its members field trips to both industrial and trucking concerns. Thus the student, through his membership in the society, enlarges his knowledge of the practical aspects of motor transportation.

First Row: H. Hoolihan, W. Vaughan, K. Roberts, R. Johnson, J. Sandusky, J. Mohr, J. Schwartz, R. Mociulewski, C. Hallawell.
Second Row: A. Koproski, L. Haarer, J. Bouman, R. Henry, D. Foster, E. Hamman, D. Miller, C. Wright, M. Winkelman, J. Pimm, C. Finleyson.

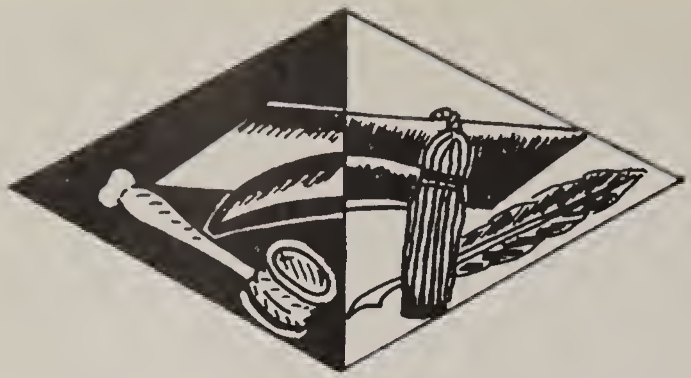
SIGMA EPSILON SOCIETY

Since its founding in 1933, the Sigma Epsilon Society has successfully provided the Business student with educational and social activities designed to promote a closer relationship among the students in the School of Commerce.

Membership in the society consists of students regularly enrolled in one of the three departments of the School of Commerce. At the bi-weekly meetings, members gain a working knowledge of business by listening to outside speakers discuss such varied subjects as law, finance, government, and accounting.

Sigma Epsilon is currently working hard in preparing for the 75th Anniversary alumni association display contest, similar to the one which gained for them the first prize in 1957.



ORGANIZATIONS

Third Row: L. Szustak, G. Colopy, J. Quirk, L. Latta, J. Wyneken, D. Connelly, D. Moorehead.

STUDENT COUNCIL

The Student Council was established in June, 1938, and was recently reorganized through the efforts of the member organizations. It has proved to be the leading campus organization. With a freer hand and more assistance from the college administration, the council is striving to promote and to coordinate the social and intramural activities on campus. Within the council itself the group fosters equitable and friendly relations between the many organizations.

Since the reorganization of the council, which automatically made the presidents of organizations members of the council, it has proved that one campus organization can secure for all students an equitable and efficient student government.

The Student Council has been especially active during the last year in promoting more social activities on campus.

During the Fall Term of 1958, the Student Council organized and administered the college's first Campus Day. The success of this Campus Day exceeded all expectations.

Prompted by its success, the Student Council officially opened the 75th Anniversary observance at Tri-State with an all-campus Field Day on May 22. The event, attended by all college personnel and their families, was a pleasant outing for all who attended.

The Council's success in kicking off the 75th anniversary program has served to enhance the organization's growing prestige on campus.

Norman Chornenki, Secretary; Edwin Carpenter, Vice-President; Frank Raczek, President; William Rinard, Treasurer.

First Row: E. Carpenter, S. Conte, R. Jackson, T. Hawkins, R. Jahns, D. Matrazzo.
Second Row: T. Sigman, R. Folkerth, E. Konarski, J. Babcock, D. Miller, J. Bouman.

BOOSTER CLUB

The purpose of the Booster Club is to promote all the general school activities which will help "boost" school spirit, to aid the school by supporting all social, athletic, and intramural activities, and encourage good sportsmanship at all inter-collegiate sporting events.

One of the most successful projects undertaken by the Booster Club was its joint sponsoring the Campus Day, held during the Fall Term of 1958. The entire Campus Day, which was a responsibility of the Booster Club, was a huge success. and was climaxed with a dance held in the Armory during the evening.

Membership in the Booster Club is open to all students, faculty members, townsmen, or anyone interested in the development of Tri-State College.

JAYCEES

The campus Jaycees state their purpose to be the promotion of "civic service through the organized efforts of the young men of the college and community; to promote the welfare of the community and its citizens through constructive projects; to provide the young men constituting its membership, training, leadership, and civic consciousness; and to better their usefulness as citizens." The Jaycees were founded at Tri-State in 1954.

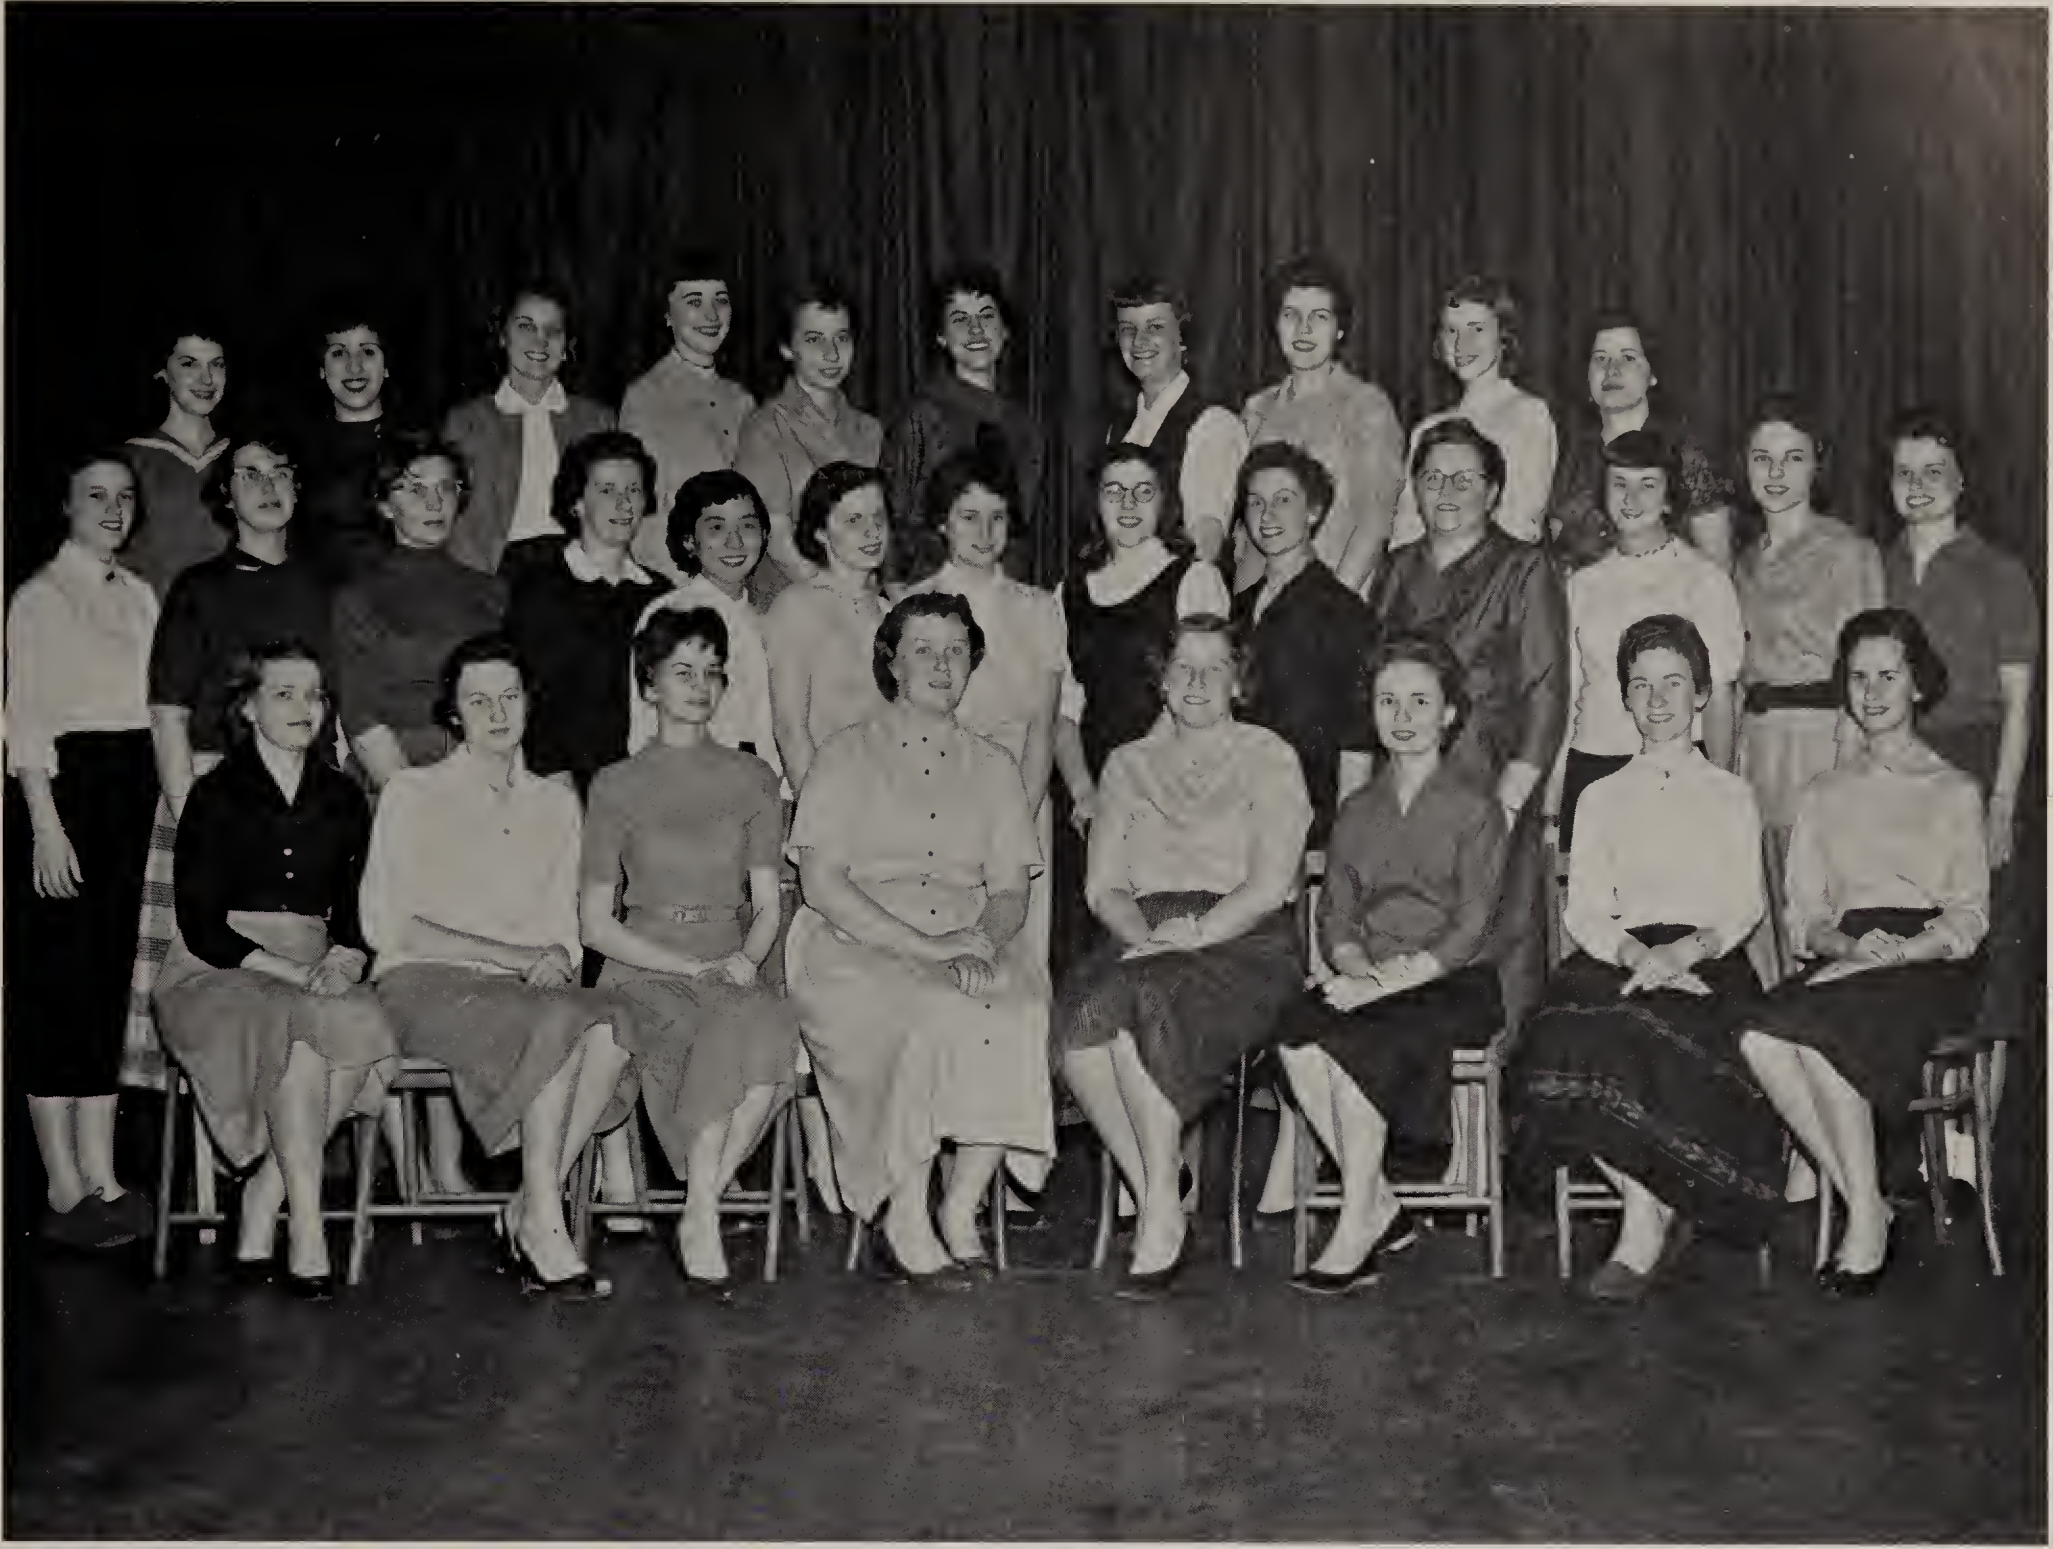
The T-Birds' Cessna 120.

The Flying Thunderbirds is an organization of Tri-State College students and faculty members who are interested in flying. It is incorporated under the laws of the State of Indiana, and is composed of members who wish to obtain their private pilots' licenses without the large expense of renting airplanes from an airport.

At present, the T-birds are engaged in accomplishing an elaborate plan of expansion, which will include their own airfield. The airfield, which is located one mile north of town on the "Drag Strip Road," will have two diagonal airstrips of turf 3000' long. Construction on this airfield was begun in November, 1958, and is nearing completion.

In this age of speed, the airplane is a prime factor in business. It is in this area that the Flying Thunderbirds are performing their greatest service.



First Row: L. King, B. Morrow, C. Smith, R. Kreider, R. Wantshouse, M. Witherspoon, V. Catlin, S. Velez.
Second Row: P. Long, E. Smith, J. Louden, J. Arend, M. Chew, G. Blaskis, A. Howard, B. Welker, M. Voyt, J. Jarrett, O. Dunaye, J. Nichelson, M. Broyles.

TRI-STATE HOMEMAKERS

The Homemakers Club was formed to promote good fellowship among the wives of Tri-State students, and to offer educational and recreational opportunities to its members. Organized in 1955, the Homemakers have worked in earnest during the last four years to attain these goals.

As an example of its activities, the Homemakers have successfully held a tea for new student and faculty wives. They have also sponsored a Valentine Dance and bake sale during the winter term.

The Homemakers' concern for the future revolves around an intensive recruiting campaign to enlarge its membership. It is hoped that eventually all the wives of students at Tri-State College will take advantage of the opportunities offered by the club.

NEWMAN CLUB

D. Clark, Corresponding Secretary; D. Siegla, Vice-President; A. Koproski, President; J. McGuire, Secretary; G. Rychtytzkyj, Treasurer.

The Newman Club, a social and religious organization for Catholic students on campus, was founded in September, 1956.

The purpose of the Newman Club is to deepen the spiritual and to enrich the temporal lives of its members through a balanced program of religious, intellectual, and social activities.

Membership is open to all Catholic students on campus. A member must go through a period of religious instruction followed by a brief religious ceremony held every term.

The club provides its members with a well-rounded program of activities, highlighted by the annual open-house at the Leo Newman Hall. Although membership is limited to Catholic students, all students are welcome to any of the club's social events.

INTERNATIONAL STUDENTS ASSOCIATION

The International Students Association was founded on campus in 1949, and its membership is open to all Tri-State students.

The purposes of the I.S.A. are to aid in the plan of world peace, and to give all students of all lands an opportunity for mutual understanding. The culture of the membership is increased through the use of movies and lectures given by students from many lands, and the use of various programs and discussions which have been presented by and for civic organizations in Angola and surrounding communities.

The motto of the organization clearly outlines its high ideals and noble purpose: *"the essence of unity is brotherhood."*

AMERICAN ROCKET SOCIETY

Receiving its charter in 1958, the Student Chapter of the American Rocket Society is the newest student organization on campus. The National Chapter of the Rocket Society dates back to 1937, but only in recent years has any formation taken place on college campuses in the United States.

The aims of the Rocket Society are to stimulate student interest in rocketry, and to increase the student's knowledge on the subject of rockets, one of the most rapidly expanding fields in industry today.

Plans are now being made to build and launch an experimental model rocket this summer. These plans are being formulated on an extensive scale, and by solving the problems that arise in attempting to launch the small rocket into space, the members of the organization will obtain a valuable practical outlook on the work that is being done in the missile industry today.

COLLEGE BAND

The college band was founded by the late Professor Almon G. Harshman in 1938. During World War II it was temporarily disbanded but was reorganized in 1947, by Roy C. Bodie, Jr., who has served since then as its director. Noted for its versatility, it plays at basketball games and during graduation exercises. Scheduled high school concerts give this musical group an opportunity to do advanced concert and solo work. During this past year, the band was assisted by the students from the Fremont High School Band.

First Row: Mrs. Olive Weicht, Pianist, D. Young, E. Acton, G. Skonning, E. Bobb, J. Misiolek, J. Mohr, S. Smith, Mrs. Robert Ramsey, Director. *Second Row:* D. Watson, D. Lorentzen, W. Vanderslice, R. Perot, F. Clevenger, J. Dipert, J. Cunningham, C. Millinger.

COLLEGE GLEE CLUB

The Glee Club is open to all students who have an interest in singing. During the year, they have sung at Recognition Day ceremonies and provided entertainment for many of the high schools in the area. Mr. Robert Ramsay founded this group in 1953, and since then she has been assisted by Mrs. Olive Weicht, the Glee Club accompanist.

CIRCLE K

Circle K Club of the college, which was founded on the campus in 1958, is a chapter of the "Circle K International," which had its origin in the United States in 1947.

A service organization sponsored by the Kiwanis Club of Angola, Circle K seeks to offer its services to the campus, to the school, and to the community, by promoting civic and campus activities on the college level.

Presently working with the Indiana Conservation Club, the American Cancer Society, and the American Red Cross, Circle K hopes to build a larger membership among Tri-State students, thus enabling it to serve more people in the community.

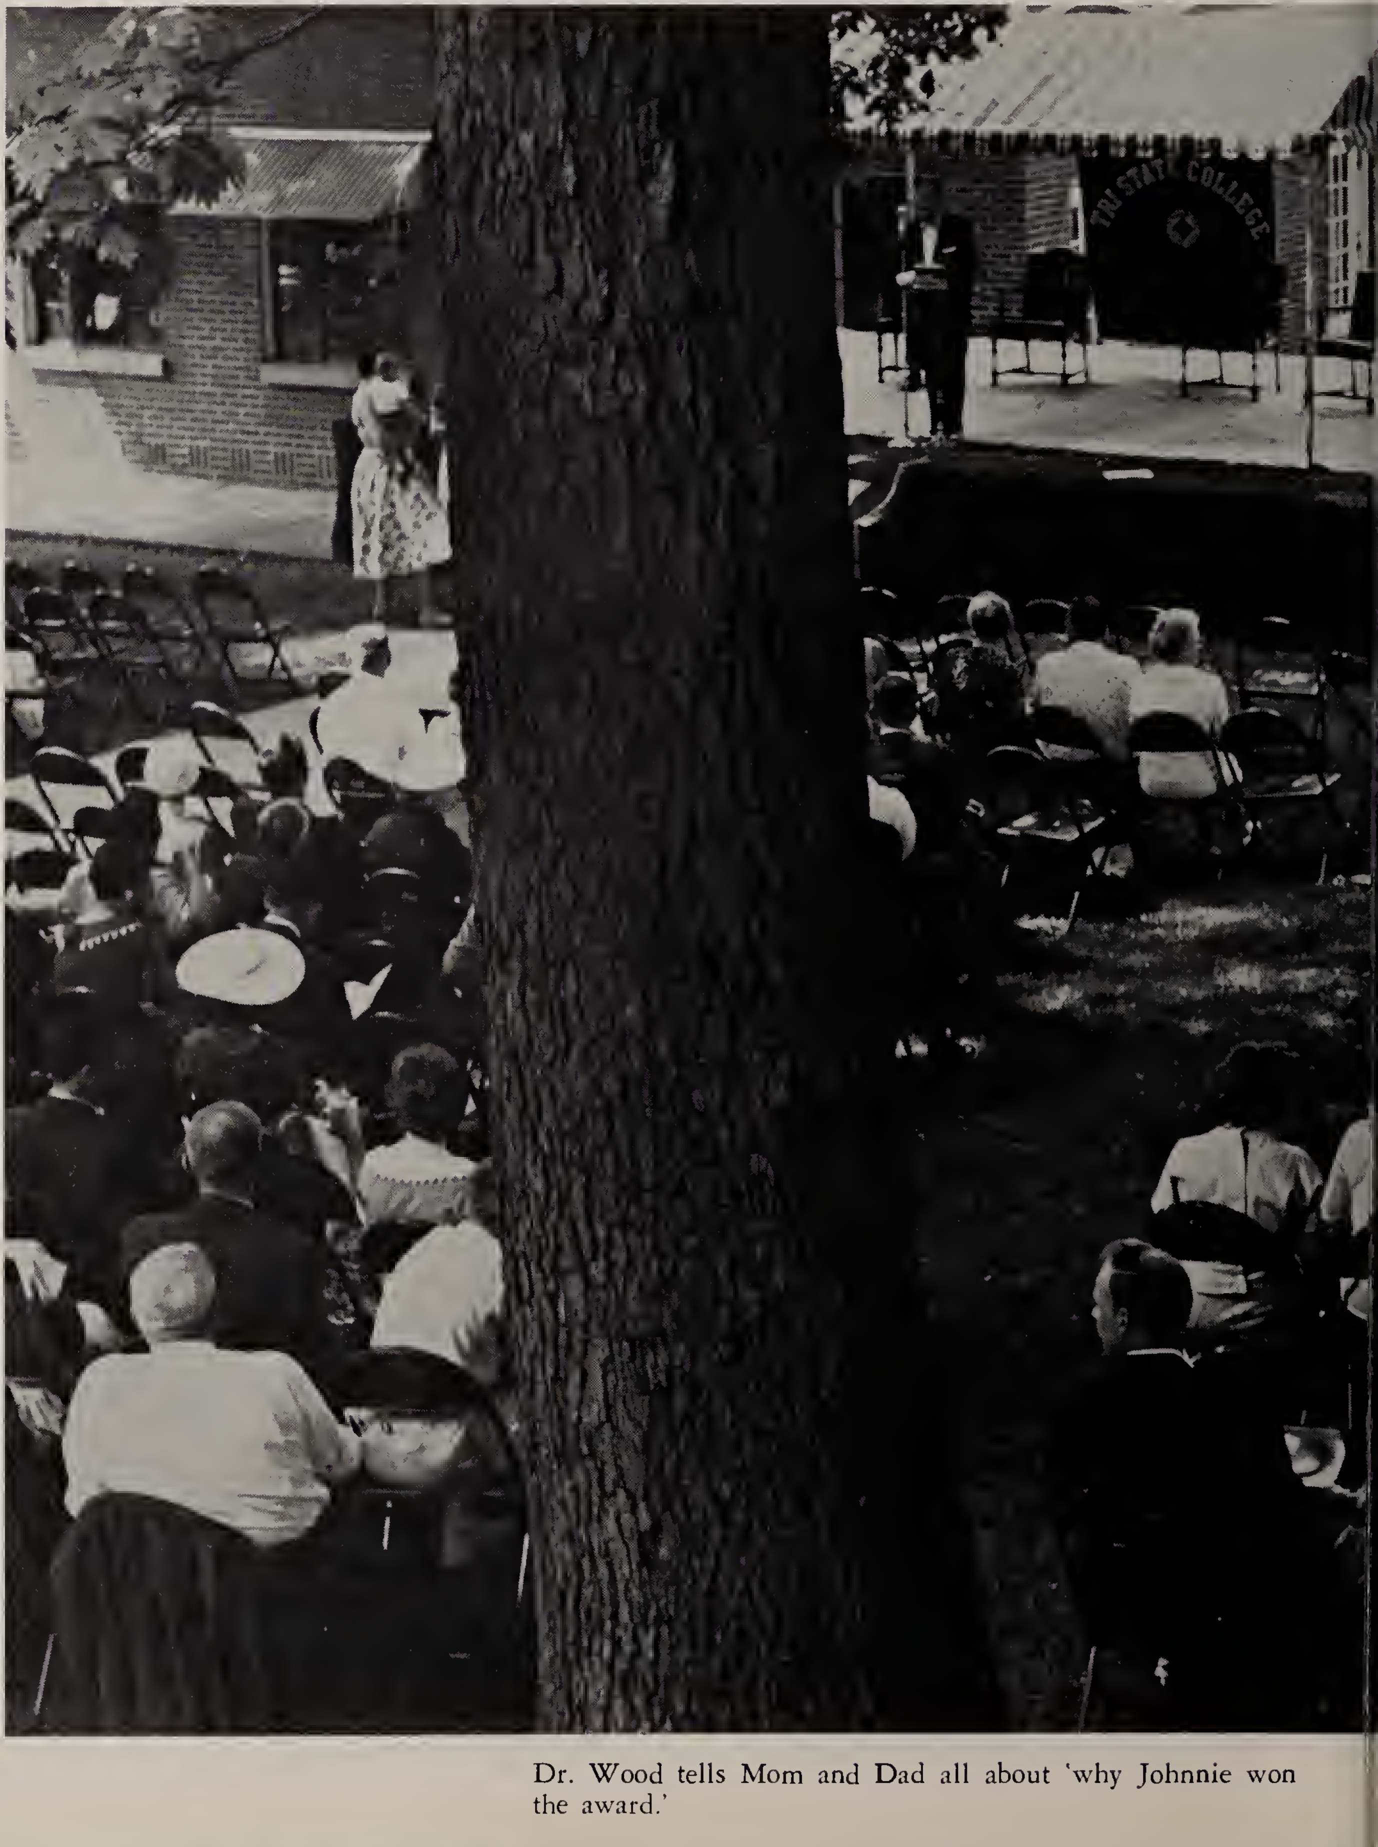
"Thank you for the candy. I helped my daddy to stay up all night with his reports."

Mrs. Dolores Houck gets an award for helping hubby over the humps and bumps. *Left to right:* Mrs. Lee McKehn presenting award to Dolores.



Dr. Wood tells Mom and Dad all about 'why Johnnie won the award.'

CLASS
DAY

President of the Student Council *FRANK RACZEK* explains the significance of Class Day award giving.

Dr. Williams congratulates and wishes them success.

" . . . and still they gazed and still the wonder grew, that one small head could carry all he knew."

Ed Ludwig, Senior Class President, leads the seniors down campus walk toward the table full of college diplomas.

A partial view of the several thousand friends

"Congratulations, Fred!"

Dr. Wood wishes success to each of the 312 seniors in this 75th anniversary graduating class.

and relatives who witnessed the graduation.

" . . . you need look at me only once and rest assured that I for one am happy Joe didn't say, "because he is a well-rounded man!"

Dr. Herman B. Wells, President, Indiana University, 75th Anniversary Commencement speaker.

FRATERNITIES

. . . many brothers have passed through its doors.

ALPHA GAMMA UPSILON

Lambda Chapter, Alpha Gamma Upsilon, had its beginning as Phi Sigma Chi in the fall of 1927. Greater benefits and more prestige initiated the desire on the part of the members to merge with a national collegiate fraternity. This desire became a reality when in May, 1949, Phi Sigma Chi received its charter and became known as Lambda Chapter of Alpha Gamma Upsilon. Since then A.G.U. has spread throughout Michigan, Indiana, Ohio, and Pennsylvania, firmly establishing itself as an ever-growing collegiate fraternity.

The present members of Lambda Chapter are meeting the challenge of the many brothers who have passed through its doors—to maintain high standing scholastically and socially.

Their float came in second during the Campus Day activities.

This house became the Beta Omicron Chapter.

ALPHA SIGMA PHI

On December 6, 1845, at Yale University Alpha Sigma Phi was formed. It is the tenth oldest national social fraternity, and it is also a charter member of the National Interfraternity Council.

The Beta Omicron Chapter dates back to 1925 when it was known as Phi Lambda Tau. In 1929 this fraternity and Alpha Delta Alpha merged, but in 1935 it disbanded. The house then became the Alpha Beta Chapter of Alpha Kappa Pi. On September 6, 1946, the A. K. Pi's merged with Alpha Sigma Phi, and this house became the Beta Omicron Chapter of Alpha Sigma Phi.

The Showboat docked at 113 N. Superior Street, Angola, Indiana.

Hosts for the 1959 National Convention.

BETA SIGMA TAU

Beta Sigma Tau, a relatively new national fraternity, was founded in May of 1948. In September of 1959 the Delta Chapter of Tri-State will serve as host chapter for the National Convention.

The Tri-State, or Delta Chapter, of Beta Sigma Tau can trace its history back to 1938 when a group of students on campus organized the Kadimah Society. This organization later evolved into the Alpha Chapter of Theta Mu Pi. During the late 1940's this fraternity was reorganized and became known as the Beta Chapter of Theta Mu Pi. In October 1950 this fraternity became affiliated with the National Fraternity of Beta Sigma Tau.

Sweethearts and Valentines come in pairs at the Beta Sig house.

In 1925 they opened the first fraternity house on the campus.

BETA PHI THETA

In November 1917 Beta Phi Theta was founded as a social organization on the campus of Milwaukee State Teachers College. It flourished purely as a social group until 1942 when the first national convention was held.

The history of the Delta Chapter at Tri-State dates back to 1922 when the "Four-Eleven Gang" was formed. Later from this organization Lambda Phi Epsilon was formed, and in 1925 they opened the first fraternity house on the campus. In 1929 the Delta Chapter of Beta Phi Theta was chartered from this first Tri-State fraternity.

And they laughed; and they talked; and they danced until there was no more!

They played like campus champs.

The House on the Hill.

KAPPA SIGMA KAPPA

The Indiana Gamma Chapter of Kappa Sigma Kappa was organized on campus in March, 1952. Prior to this date, the Kappa Sigma Kappa house had been associated with various fraternities. "The House on the Hill" served the original chapter of the present Sigma Mu Sigma Fraternity until 1936, when the remaining actives merged with a large national fraternity. After a brief period with a local fraternity, the house became the home of Tau Kappa Epsilon in 1947. In 1952 Tau Kappa Epsilon withdrew from the campus, and in March of the same year Kappa Sigma Kappa took over "The House on the Hill."

The Kappa Sig standard is now a part of the living room.

The site for the August, 1959, National Convention.

SIGMA MU SIGMA

The Alpha Chapter of Sigma Mu Sigma was founded at Tri-State on Good Friday, in March, 1921. The fraternity, which was founded by three Master Masons, was elected to the National Organization at Washington, D. C., in June, 1924.

The primary purposes of Sigma Mu Sigma are to instill in its members the three principles of sincerity, morality, and scholarship; to create a well-balanced college life; and to create men who will be capable of taking their places in business and in industry.

The Alpha Chapter was honored by being selected as the site of the National Convention in August, 1959.

Continuous remodeling enhanced its appearance.

SIGMA PHI DELTA

Sigma Phi Delta, an international fraternity of engineers, was founded on campus in 1947. Our Kappa Chapter was an outgrowth of the interest of Mr. LeRoy Horpedahl of Epsilon Chapter, who was serving on the college faculty. The need for an engineering fraternity was apparent to engineering students, and by May, 1947, 39 undergraduates had been installed as Kappa Chapter, the fraternity's first postwar chapter.

During its early growth, Kappa was located on Pleasant Street. In 1952, Kappa purchased its own house on College Street and continuous remodeling and planning have increased the capacity and enhanced the appearance.

In the near future Sigma Phi Delta is planning its National Convention at the University of California at Berkeley. The brothers of Kappa Chapter, both active and alumni, are planning to attend.

Too old to remember, too young to forget!

And away they sped in their chariot of gold . . .

And on 13 acres of land they shall build for posterity.

PHI KAPPA THETA

The youngest fraternity on campus, Phi Kappa Theta National Catholic Fraternity was produced by a consolidation of Phi Kappa and Theta Kappa Phi in April, 1959.

Phi Kappa was founded at Tri-State in 1943, but its origin as a national fraternity dates back to 1889 when it was begun at Brown University. Theta Kappa Phi was founded in 1919 at Lehigh University.

The newly-chartered fraternity endeavors to encompass the moral, the spiritual, and the ethical conduct of its members by developing in them the art of working and living together in a united fraternity.

Though a young fraternity on campus, Phi Kappa Theta is planning for its future, as evidenced by a recent purchase of 13 acres of land located southwest of the college on which it plans to construct a new fraternity house and recreational facilities for its members.

INTRA-FRATERNITY COUNCIL

In 1935, the Pan-Hellenic Council was founded on campus, and in 1936 it became known as the Intra-Fraternity Council. Membership is composed of two representatives elected by each member fraternity. The purpose of the I.F.C. is to unite the mutual interests of fraternities on campus and to promote a better and closer relationship with the faculty, the student body, and the fraternities.

SEASON'S RESULTS

Tri-State	9	Albion College	9
Tri-State	6	Indiana Tech	12
Tri-State	30	Indiana Tech	6
Tri-State	7	Kalamazoo College	8
Tri-State	6	Notre Dame	30
Tri-State	10	Hillsdale College	26
Tri-State	8	Western Michigan	28
Tri-State	13	Concordia College	5
Tri-State	22½	Concordia College	13½

At first glance, the golf team's record of 3 won, 5 lost, and 1 tie, looks disappointing. Much of the opposition throughout the year, however, consisted of larger schools. Against schools in our class, the golf team more than held its own.

The team also participated in the Little State golf meet at Indianapolis on May 15, and finished 13th in a 19-team field.

Keith Miller, with a competitive season's average of 78, and Larry Miller, who closed the season with a 79-stroke average, paced the team scoring.

Pull the pin! Haben has it lined up perfectly.

"Hey, Mr. Long, we're not conceding any putts today!"

Baker's wondering if he can reach the green with that 9-iron.

Take your time, Wetzel. You're going for a birdie.

L. Henderson, Team Captain; V. Lutyz; J. Browne; J. Lamerand; L. Rudy; D. Rupert, Manager.

TENNIS

The tennis team, hampered by poor weather throughout the season, was able to schedule and play only a few matches. The spring rains made extensive practice impossible, and the already inexperienced players had little opportunity to mold themselves into an effective tennis unit.

The Tri-Staters are looking forward to a successful fall season, and they hope to be able to schedule and play matches under more favorable weather conditions.
